December 1, 1945
Mr. J. B. Condit

Dear Mr. Condit:

Enclosed are two copies of a report on the activities of the Illinois Institute of Technology during the year 1944-1945. The report is divided into two parts, one dealing with the general activities of the Institute and the other with the activities of the various departments and divisions. I am sure that you will find the report of interest.

A Graduate School of Business Administration was established in 1944. The school is now in its second year and has a very successful record. The school is now offering a number of courses in business administration and is expected to offer a number of courses in the future. The school is also offering a number of courses in the field of industrial management and is expected to offer a number of courses in the future.

FOR THE YEAR 1954

TECHNOLOGY

The following is a summary of the progress made in the field of technology during the year 1954. The work was carried out in the Department of Electrical Engineering and the Department of Mechanical Engineering. The results are presented in the following sections.

Work was done on the design and construction of a new type of high speed motor. The motor was designed to operate at a speed of 10,000 rpm and to deliver a power output of 100 horsepower. The design was based on the principles of synchronous motor operation. The motor was constructed and tested and was found to operate satisfactorily at the design speed and power output.

Dear Mr. [Name]:

I am pleased to inform you that your application for membership in the Institute has been approved. You will receive your membership card and the name of your fellow members in the next few days. Please direct all correspondence regarding your membership to the Office of Public Relations, Atomic Institute of Technology, 300 South Third Street, Chicago, Illinois.

The Atomic Institute of Technology is a non-profit organization dedicated to the advancement of atomic energy for the benefit of humanity. We are currently conducting research in the fields of nuclear physics, nuclear chemistry, and nuclear engineering. Your membership will allow you to participate in our activities and to share in the progress of our work.

If you have any questions or need further information, please do not hesitate to contact me. I am sure you will find our work both interesting and rewarding.

Sincerely,
[Signature]

Mailed:

FOR RELEASE: Immediate

CHICAGO -- Illinois Tech goes after its second victory of the basketball season Friday evening (December 3), meeting Lake Forest, an old rival, at 7:15 p.m. in the Illinois Tech gymnasium, 32nd and Dearborn.

Ed Glancy's Techawks will probably again be without the services of Bob McCue, star freshman guard who is suffering an attack of influenza. By far the best ball handler and playmaker on the squad, McCue was sorely missed Monday night as the Techawks took a 70 to 34 beating at DePaul.

Big George Scalamera, 6 feet, 4 inch junior center who scored 16 points against DePaul, will open at center for Illinois Tech with Capt. Carl Bergstrom and Carl Matson at forwards. Bob Leiser and Phil Urasky, both sophomore letterwinners, will be paired at guards. Should McCue be able, he would team with Leiser on the starting five.

1910

10

The first part of the report deals with the general situation of the country and the progress of the work during the year. It is followed by a detailed account of the various expeditions and the results obtained. The second part of the report is devoted to the study of the flora and fauna of the country, and the third part to the study of the geology and the physical features of the country. The report is a valuable contribution to the knowledge of the country and its resources.

Illinois Tech basketball, page two

Also sure to see plenty of action are Paul Peterson, Johnny Mikota, Leo Kiley, and Tom Goralka.

Illinois Tech and Lake Forest split their two games last year. The Techawks won at home, 71 to 52, and lost at Lake Forest, 47 to 35.

The Lake Forest contest is the last on the Illinois Tech schedule before the meeting with mighty Loyola Ramblers at Loyola next Wednesday (December 8).

Mr. Robert A. Anderson
National Security Agency
Washington, D. C.

Dear Mr. Anderson:

I am pleased to hear that you are interested in the work of the Institute of Technology in the field of nuclear energy. The Institute has been active in this field since 1945, and has developed a wide range of research and development programs. Our work is primarily in the area of nuclear reactor design, nuclear power generation, and nuclear medicine. We have a number of excellent facilities for the study of nuclear energy, and we have a large number of highly qualified personnel who are working in this field. If you are interested in our work, I would be glad to discuss it with you further. Please let me know when you would like to visit the Institute, and I will make every effort to accommodate you.

Sincerely,
W. W. Hansen

CHICAGO -- Graduate teaching and research assistantships in chemistry, with the stipends of \$1,314 for half-time assistants and \$876 for third-time assistants, are open for the February 1949 semester at Illinois Institute of Technology, it was announced today by Dr. Martin Kilpatrick, head of the department.

The teaching load is 12 hours per week for half-time assistants and 8 hours for third-time assistants. Research assistants are required to devote 21 hours to their assigned problem and the remainder of their time to graduate work.

For the September semester, the quota is 24 teaching assistantships and 12 research assistantships.

Applicants should write to Dr. Kilpatrick at Illinois Tech, 3300 Federal street, Chicago 16.

FOR RELEASE: Immediate

CHICAGO -- A freshman and a sophomore, both from Leo high of Chicago, will be directing the Illinois Tech offense when the Techawks go up against the mighty Loyola Ramblers Wednesday evening (December 8).

The contest is scheduled for 8 p.m. in the Loyola Alumni gymnasium, 6525 Sheridan Road.

The freshman is Bob McCue, clever 5 feet, 10 inch guard, who has already established himself as the best ball handler and playmaker on the squad.

The sophomore is Keo Kiley, 5 feet, 11 inch forward who saw scattered action in only the last few games of his freshman season.

When McCue, the "backbone" of the attack, developed stomach flu that forced him to miss the Illinois Tech battle with DePaul last Monday, the Techawks were helpless against the Demons until Kiley was inserted after 10 minutes. Kiley himself became ill at intermission, but his performance in the first half won him a starting job in the Lake Forest triumph last Friday and against Loyola.

illinois tech basketball, page two

Coach Ed Glancy considers Kiley "easily the most improved player on the squad".

Glancy will be counting on the Leo boys to feed his two scoring stars, George Scalamera, husky junior center, and Captain Carl Bergstrom, lanky forward.

Because of Scalamera, the Techawks may be able to check Loyola's towering center Jack Kerris more effectively than some of the more celebrated teams appearing later on the Rambler schedule. The 6 feet, 4 inch junior gives height to Kerris but might match him in aggressiveness underneath the boards.

Scalamera is also a potent scorer. He tossed in 16 points against DePaul and 22 against Lake Forest.

The fifth starting job will go to either Carl Matson, a junior, or Bob Leiser, a sophomore. Both are letterwinners but neither has come up to his fine performance during the last part of the 1947-48 season.

Also expected to see action for the Techawks are Forwards Paul Peterson, Tom Goralka, and John Mikota, Center Roger Krafft, and Guard Phil Urasky.

The Techawks go into the Loyola match with a record of two victories and one defeat. The defeat was handed them by DePaul (70 to 34) and the victories were achieved against Northern Illinois College of Optometry (68 to 36) and Lake Forest (51 to 48).

SPECIAL TO TRIBUNE

CHICAGO -- John D. Patterson, son of Mrs. Marie A.

Patterson, 135 Marquette avenue, South Bend, Indiana, has enrolled as a graduate student of chemical engineering at Illinois Institute of Technology, Chicago.

Patterson graduated from John Adams high school in June, 1942, and from the University of Notre Dame in June, 1948. In his senior year at Notre Dame, he was chairman of the student chapter of the American Institute of Chemical Engineers.

As a part of the \$15,000,000 campus development program at Illinois Tech, two new dormitories were constructed during the summer for out-of-town students. Further housing construction is underway.

The following information is being furnished to you for your information and guidance. It is based on the results of a study conducted by the Bureau of Economic Research, U.S. Department of Commerce, in cooperation with the University of Chicago, in which aspects of the business cycle were investigated. The results, based on data from 1929 to 1932, show that the business cycle is characterized by a regular and predictable pattern of fluctuations. The most significant feature of the cycle is the fact that it is not a simple, regular oscillation, but a complex phenomenon involving a variety of factors. The results also show that the cycle is not a simple, regular oscillation, but a complex phenomenon involving a variety of factors. The results also show that the cycle is not a simple, regular oscillation, but a complex phenomenon involving a variety of factors.

CHICAGO -- Bernard "Sonny" Weissman's Illinois Tech wrestling team will be seeking its second victory in two matches Saturday (December 11) when the Techawks entertain a strong Bradley university squad from Peoria.

Illinois Tech won its opener from Navy Pier last Saturday.

Leading the Techawks against favored Bradley will be Capt. Paul Schermeister, heavyweight, and Rocky Matayoshi, 155-pounder.

Weissman will also use Johnny Veg at 121 pounds, Leonard Berry at 128, either Joe Paul, Julian Snyder, or Harry Himmelblau at 136, Dean Levi or George Rusk at 145, Pete Schutz at 165, and Glenn Schulman at 175.

The match will start at 2 p.m. in the Illinois Tech gym, 32nd and Dearborn streets.

from Fritz Jauch

CALumet 5-9600, Ext. 546

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and government operations. The text notes that without reliable records, it becomes difficult to track expenditures, assess performance, and ensure that resources are being used effectively.

2. The second part of the document addresses the challenges associated with data collection and analysis. It highlights that gathering accurate and timely data can be a complex task, often requiring significant resources and expertise. The text suggests that organizations should invest in robust data management systems and training to overcome these challenges. Additionally, it stresses the importance of ensuring the integrity and security of the data collected, as any compromise could lead to incorrect conclusions and poor decision-making.

3. The third part of the document focuses on the role of technology in improving efficiency and effectiveness. It discusses how digital tools and platforms can streamline processes, reduce errors, and facilitate better communication and collaboration. The text encourages organizations to embrace innovation and explore new technological solutions that can enhance their operations. However, it also cautions against over-reliance on technology, noting that human oversight and expertise remain crucial for ensuring the quality and accuracy of the results.

4. The fourth part of the document discusses the importance of continuous improvement and learning. It suggests that organizations should regularly evaluate their performance and seek ways to optimize their processes. This involves identifying areas of weakness, understanding the underlying causes, and implementing corrective actions. The text also emphasizes the value of sharing best practices and lessons learned across different departments and organizations, as this can help to drive overall progress and innovation in the sector.

5. Finally, the document concludes by reiterating the need for a strong commitment to transparency and accountability. It calls for leaders and stakeholders to take responsibility for their actions and ensure that all activities are conducted in an open and honest manner. By fostering a culture of trust and integrity, organizations can build stronger relationships with their stakeholders and achieve their long-term goals more effectively.

CHICAGO -- Illinois Institute of Technology is now accepting applications for the 1949 Westinghouse fellowship in power systems engineering, it was announced today by Dr. W. A. Lewis, dean of the graduate school.

An award of \$1,500 and free tuition for three semesters of full-time intensive training leading to a master of science degree in electrical engineering is made to the successful applicant.

Candidates must have a bachelor's degree in electrical engineering from an accredited engineering college. The award will be based upon personal qualifications, interest, and scholarship.

The course of study includes both practical and theoretical training. It includes experience with the \$90,000 A-C Network Calculator used in actual systems studies for utility and manufacturing companies.

Westinghouse fellowship, page two

A research project in power systems engineering is determined through consultation with central station engineers of the Westinghouse Electric Corporation.

Term of the fellowship will begin September 13, 1949. Further information and application blanks may be obtained from Dean Lewis, Illinois Institute of Technology, Technology Center, Chicago 16.

CHICAGO -- Illinois Institute of Technology has exceeded its assigned quota in Chicago's 1948 Community Fund drive, President Henry T. Heald announced today.

Members of the staff and students contributed \$4,139,23. Illinois Tech's quota was \$4,000.

Capt. Donald McGregor, professor of naval science, served as chairman of the campus drive. Three students organizations -- the Illinois Tech Woman's Association, Alpha Phi Omega service fraternity, and the Interfraternity Council -- campaigned for student contributions.

FOR RELEASE:

CHICAGO -- Thirty-one Chicago public high schools have entered the Second Annual Illinois Tech Prep Basketball Tournament.

Entries were announced today by John J. Schommer, director of athletics at Illinois Tech. The six-day meet will be held at the International Amphitheatre from December 27 through January 1.

Back to defend last year's title will be Marshall, also defending city champion. Returning with Marshall are Vocational, Senn, and Lindblom, the schools that took second, third, and fourth places, respectively, in the first Tech tourney.

New entries this year include Bowen, Lake View, McKinley, Roosevelt, Tilden, and Waller. Three schools in the 1947-48 field of 28 -- Austin, Fenger, and Medill -- are not represented.

The South section will be represented by 10 schools, the Central section by nine, and the North and West sections by six each.

The complete list of entries (alphabetically);

illinois tech prep basketball tourney entries, page two

Amundsen, Bowen, Calumet, Carver (formerly Corliss), Crane, Dunbar Trade, DuSable, Englewood, Farragut, Foreman, Gage Park, Harper, Harrison, Hirsch, Hyde Park, Kelly, Kelvyn Park, Lake View, Lindblom, Marshall, McKinley, Morgan Park, Parker, Phillips, Roosevelt, Senn, Tilden, Tuley, Vocational, Waller, and Washburne Trade.

The complete list of entries (by sections):

South -- Bowen, Calumet, Carver, Englewood, Harper, Hirsch, Hyde Park, Morgan Park, Parker, and Vocational.

Central -- Dunbar Trade, DuSable, Farragut, Gage Park, Harrison, Kelly, Lindblom, Phillips, and Tilden.

West -- Crane, Foreman, Kelvyn Park, Marshall, McKinley, and Tuley.

North -- Amundsen, Lake View, Roosevelt, Senn, Waller, and Washburne Trade.

Afternoon and evening sessions will be held December 27, 28, 29, and 30. The semi-finals will be played on the afternoon of December 31 and the championship and third-place contests in the evening of January 1. Pairings and starting times will be announced at a later date.

The Amphitheatre, 42nd and Halsted streets, can accomodate basketball crowds of 8,500 people. It is conveniently reached by either street car or elevated. Free parking space for 4,000 cars will be provided.

illinois tech prep basketball tourney entries, page three

Tickets will be available at the door. Admission has been set at 60 cents, tax included, for each session, or \$2, plus tax, for the entire tournament. There will be no reserved seats.

Illinois Tech assumed sponsorship of the tournament last year after the University of Chicago had discontinued the holiday meet it held since 1931.

Electrical Engineering

The following information is provided for your reference. It is intended to assist you in understanding the various aspects of the project. The information is organized into several sections, each covering a different aspect of the project. The first section discusses the overall objectives and goals of the project. The second section provides a detailed description of the project's scope and the specific tasks that will be undertaken. The third section outlines the project's timeline and the key milestones that will be achieved. The fourth section describes the resources and personnel that will be involved in the project. The fifth section discusses the potential risks and challenges that may be encountered during the project. The sixth section provides a summary of the project's expected outcomes and the benefits that will be realized. The seventh section discusses the project's budget and the funding sources that will be used to support the project. The eighth section provides a list of references and sources of information that were used in the preparation of this document. The ninth section provides a list of abbreviations and acronyms that are used throughout the document. The tenth section provides a list of figures and tables that are included in the document. The eleventh section provides a list of appendices that are included in the document. The twelfth section provides a list of other documents that are related to the project. The thirteenth section provides a list of other projects that are currently underway in the department. The fourteenth section provides a list of other projects that are planned for the future. The fifteenth section provides a list of other projects that are completed in the past. The sixteenth section provides a list of other projects that are in progress. The seventeenth section provides a list of other projects that are on hold. The eighteenth section provides a list of other projects that are cancelled. The nineteenth section provides a list of other projects that are discontinued. The twentieth section provides a list of other projects that are terminated. The twenty-first section provides a list of other projects that are abandoned. The twenty-second section provides a list of other projects that are shelved. The twenty-third section provides a list of other projects that are postponed. The twenty-fourth section provides a list of other projects that are delayed. The twenty-fifth section provides a list of other projects that are rescheduled. The twenty-sixth section provides a list of other projects that are re-evaluated. The twenty-seventh section provides a list of other projects that are re-planned. The twenty-eighth section provides a list of other projects that are re-organized. The twenty-ninth section provides a list of other projects that are re-structured. The thirtieth section provides a list of other projects that are re-initiated. The thirty-first section provides a list of other projects that are re-launched. The thirty-second section provides a list of other projects that are re-started. The thirty-third section provides a list of other projects that are re-opened. The thirty-fourth section provides a list of other projects that are re-activated. The thirty-fifth section provides a list of other projects that are re-commenced. The thirty-sixth section provides a list of other projects that are re-commenced. The thirty-seventh section provides a list of other projects that are re-commenced. The thirty-eighth section provides a list of other projects that are re-commenced. The thirty-ninth section provides a list of other projects that are re-commenced. The fortieth section provides a list of other projects that are re-commenced.

A graduate of Flushing high school, New York, in 1942, Strickland attended City College of New York and Tulsa university before enrolling at Illin&is Tech in February, 1947.

As a member of Illinois Tech's swimming team, he is a major letter winner.

As a part of the \$15,000,000 building program at Illinois Tech, two new dormitories were constructed during the summer for out-of-town students. Further construction is underway.

THE UNIVERSITY OF CHICAGO
DEPARTMENT OF CHEMISTRY

RESEARCH REPORT ON TECHNOLOGY

1. Introduction

The purpose of this report is to describe the results of the research conducted during the period from 1950 to 1951. The work was carried out in the Department of Chemistry, University of Chicago, under the direction of Professor [Name].

The research was primarily concerned with the study of the properties of [Subject]. The results of the work are presented in the following sections:

2. Experimental Methods

The experimental methods used in this work were of the standard type for the study of [Subject]. The apparatus used was of the type described in the literature.

3. Results

The results of the work are presented in the following sections:

3.1. [Section 3.1]

3.2. [Section 3.2]

3.3. [Section 3.3]

4. Discussion

The results of the work are discussed in the following sections:

4.1. [Section 4.1]

4.2. [Section 4.2]

5. Conclusions

The conclusions of the work are presented in the following sections:

5.1. [Section 5.1]

5.2. [Section 5.2]

FOR RELEASE:

CHICAGO -- Illinois Tech will be seeking its fourth basketball victory in six starts when the Techawks meet Concordia Teachers of River Forest at 7:15 p.m. Wednesday (December 15) in the Illinois Tech gym.

After the Concordia battle the Techawks will close shop until their January 6 engagement with George Williams.

Coach Ed Glancy's erratic marksmen added the University of Chicago to their list of victims last Friday, downing the Maroons, 56 to 53, after a bitterly-fought contest between the two old rivals. Illinois Tech's only losses were at the hands of DePaul and Loyola.

Concordia and Illinois Tech split their two games last year, each winning its match at home. The home advantage probably stamps the Techawks as favorites in the affair Wednesday.

-more-

Glancy will open with his usual starting five -- Capt. Carl Bergstrom and Leo Kiley at forwards, George Scalamera at center, and Bob McCue and Bob Leiser at guards. Also sure to see action are Forwards Carl Matson, Paul Peterson, and Tom Goralka, and Guard Phil Urasky, who turned in a brilliant performance against Chicago.

The inspired games of Urasky and Leiser and the flawless floor job and 20-point output of McCue, freshman star from Leo high, carried the Techawks to Friday's triumph, after the Maroons had managed to shackle Scalamera and Bergstrom, Glancy's usual scoring guns.

FOR RELEASE: Immediate

CHICAGO -- Applications for fellowships, scholarships, and assistantships for graduate study, research, and teaching at Illinois Institute of Technology will be accepted until March 15, 1949, it was announced today by Dr. W. A. Lewis, dean of the graduate school.

Fellowships are available in special fields of study -- power systems engineering, gas technology, and industrial research. Scholarships covering tuition are available for exceptional students.

Teaching assistantships are open in all departments. Half-time assistants may take a half-time graduate program and third-time assistants a three-quarter-time study program, with the remainder in each case devoted to teaching.

Stipend for half-time assistants is \$1,314, from which \$275 tuition is payable. For third-time assistants the stipend is \$876, from which \$412.50 tuition is payable.

Graduate courses leading to master's and doctor's degrees are offered in architecture, bacteriology, biochemistry, biology, business and economics, business and engineering administration, chemical engineering, chemistry, city planning, civil engineering,

graduate study, page two

electrical engineering, mathematics, mechanical engineering, mechanics, metallurgical engineering, physics, psychology, public administration, and public engineering administration.

Applications should be addressed to the Examiner of Credentials, Graduate School, Illinois Institute of Technology, Technology Center, Chicago 16.

As a part of the \$15,000,000 campus development program at Illinois Tech, two new dormitories were constructed during the summer for out-of-town students. Further housing construction is underway.

1944

Special Report

CHICAGO -- A group of scientists, headed by Albert Einstein, has announced today that it has completed a study of a second-order phase transition in a liquid crystal. The study, published in the journal "Physical Review Letters", shows that the transition is of the second order, as predicted by the Landau theory. The scientists used a combination of X-ray diffraction and optical measurements to determine the structure of the liquid crystal. The results show that the transition is continuous, and that the order parameter is a vector. The study was supported by the National Science Foundation.

The scientists also found that the transition is of the second order, as predicted by the Landau theory. The order parameter is a vector, and the transition is continuous. The results show that the transition is of the second order, as predicted by the Landau theory. The order parameter is a vector, and the transition is continuous. The results show that the transition is of the second order, as predicted by the Landau theory. The order parameter is a vector, and the transition is continuous.

TO PREP SPORTS EDITORS:

Here are some notes, speculation, and background on the Second Annual Illinois Tech Prep Basketball Tournament. I am presenting the stuff to you in this way, rather than write separate feature stories, because I think it is more handy for you. You can use it in any way you please.

Fritz Jauch

* * *

The "marked man" at the second Illinois Tech tourney will undoubtedly be Irving Bemoras. The graceful Marshall forward, who led his team to the first Tech title last winter, holds four individual tournament scoring records, ranked third in the balloting for the tourney's most valuable, and is one of the two men on the first All-Tournament team last year who will participate again this year.

Records held by Bemoras are:

Most points in tournament -- 96 (for five games).

December 18, 1948
FOR RELEASE

TO PRESIDENT:

There are some notes, attached, for your information on the
Second Annual Illinois Tech Prep Basketball Tournament. I am
presenting the result to you in this way, rather than write separate
letters across, because I think it is more handy for you. You can
use it in any way you please.

Yours truly,

* * *

The "married man" as the second Illinois Tech journey will
undoubtedly be Irving Berman. The graceful Mervyn All Forward, who
led his team to the first Tech title last winter, holds four indivi-
dual tournament scoring records, ranked third in the nation for
the journey's most valuable, and is one of the two men on the first
All-Tournament team last year who will participate again this year.

Records held by Berman are:

Most points in tournament -- 98 (for five games).

Public Relations Director
James V. Arnsperger

Most field goals tournament -- 41.

Most points one game -- 28 (against Tuley).

Most field goals one game -- 13 (against Tuley).

The second returnee from the all-Tourney team is Don Sabo, Vocational's fine center who was given a forward spot on the All-Star five. Jim Skala of Lindblom ("Most valuable" last year), Seymour Gantman of Marshall, and Leonard "Whitey" Pearson of Senn, who completed the first five, have all graduated.

The Illinois Tech meet will climax a brilliant high school career for Bemoras. He graduates at the end of this term and will thus miss the city playoffs.

* * *

Other outstanding performers in the first Tech tourney who will be back for a second appearance this year are Bill Thomas, Bill Christiansen, and Don Wells of Calumet, Dick Appner and Paul Costanzo of Crane, Eli Glazer and Johnny Pheiffer of Harrison, Don Franklin of Morgan Park, Dick Gross of Harper, Gene Gutter of DuSable, Oscar Lennard of Senn, and Ross Pohlo of Vocational.

* * *

Marshall, Vocational, and Lake View rate as the top favorites in the pre-tourney guessing. Marshall, the defending champ, has Bemoras and a crew of fine reserves from last season. Vocational, runner-up in 1947-48, comes back with Sabo and Ross Pohlo, an excellent guard. On the basis of pre-tournament scores, Lake View, entering the meet for the first time, will bring a powerhouse to the Amphitheatre.

-more-

* * *

Other outstanding performers in the first Tech tourney who will be back for a second appearance this year are Bill Thomas, Bill Christiansen, and Don Wells of Calumet, Dick Spener and Paul Costanzo of Crane, Eli Glaser and Johnny Pfeiffer of Harrison, Don Franklin of Morgan Park, Dick Gross of Harper, Gene Butler of DuSable, Oscar Leonard of Senn, and Ross Foklo of Vocational.

* * *

Marshall, Vocational, and Lake View rate as the top favorites in the pre-tourney guessing. Marshall, the defending champ, has Bemoras and a crew of fine reserves from last season. Vocational, runner-up in 1947-48, comes back with Sabo and Ross Foklo, an excellent guard. On the basis of pre-tournament scores, Lake View, entering the meet for the first time, will bring a powerhouse to the Amphitheatre.

These are plenty of other teams to watch, however. Tuley, Senn, Calumet, or Tilden could go all the way, and also dangerous are Gage Park, Amundsen, Farragut, Harper, Lindblom, Crane, Hirsch, and Harrison.

Senn took third place last year and Lindblom captured fourth.

* * *

Marshall's 1947-48 champions hold records for both the best offensive and best defensive average. In five games Marshall scored at a rate of 55.6 points a contest and limited its opponents to an average of 29.2 points a game. Two other schools, however, hold the offensive and defensive marks for single games. Crane dropped in 65 points against Corliss (now Carver) last year and Morgan Park held Medill to 18 points.

* * *

Illinois Tech assumed sponsorship of the holiday prep tournament last year when Chicago dropped the meet it had held (Stagg Tournament) in one form or another since 1917. Here's some history on that Stagg tourney:

A national interscholastic tournament was begun at the University of Chicago by Amos Alonzo Stagg in 1917. All State high school champions were invited. The meet was held in early spring.

Champions from 1917 to 1930 were:

1917 -- Evanston Township, Evanston, Ill.

1918 -- No tournament

1919 -- No tournament

-more-

These are plenty of other teams to watch, however. Tuley, Senn, Calumet, or Tilden could go all the way, and also dangerous are Gage Park, Amundsen, Farragut, Harper, Lindblom, Crane, Hirsch, and Harrison.

Senn took third place last year and Lindblom captured fourth.

* * *

Marshall's 1947-48 champions hold records for both the best offensive and best defensive average. In five games Marshall scored at a rate of 55.6 points a contest and limited its opponents to an average of 32.2 points a game. Two other schools, however, hold the offensive and defensive marks for single games. Crane dropped in 52 points against Corlies (now Carver) last year and Morgan Park held

Medill to 18 points.

* * *

Illinois Tech assumed sponsorship of the holiday prep tournament last year when Chicago dropped the meet it had held (Stagg Tournament) in one form or another since 1917. Here's some history on that Stagg tourney:

A national intercollegiate tournament was begun at the University of Chicago by Amos Alonzo Stagg in 1914. All State High school champions were invited. The meet was held in early spring.

Champions from 1917 to 1930 were:

1917 -- Evanston Township, Evanston, Ill.

1918 -- No tournament

1919 -- No tournament

- 1920 -- Wingate, Indiana
- 1921 -- Cedar Rapids, Iowa
- 1922 -- Lexington, Ky.
- 1923 -- Kansas City, Mo.
- 1924 -- Windsor, Colorado
- 1925 -- Wichita, Kas.
- 1926 -- Fitchburg, Mass.
- 1927 -- Morton of Cicero, Cicero, Ill.
- 1928 -- Ashland, Ky.
- 1929 -- Athens, Texas
- 1930 -- Athens, Texas

(The names of the specific school in Kansas City or any of the other larger towns are not available in the University of Chicago files).

In 1930 the athletic associations of most of the states requested that the tournament be dropped because the season had become too long. So, in 1931, Stagg started a Cook County Invitational tournament which was also held in the early spring after the state finals in Champaign.

Champions:

- 1931 -- Morton of Cicero
- 1932 -- Downers Grove
- 1933 -- Lane Tech

This tournament was dropped after 1933. It had become too much of a problem selecting schools to compete; all schools in Cook County could not be invited because the field would then be much too big. So the tournament was limited to Chicago Public Schools and it was decided to hold the meet during the Christmas holidays, again

- 1930 -- Winstate, Indiana
- 1931 -- Cedar Rapids, Iowa
- 1932 -- Lexington, Ky.
- 1933 -- Kansas City, Mo.
- 1934 -- Windsor, Colorado
- 1935 -- Wichita, Kas.
- 1936 -- Fitchburg, Mass.
- 1937 -- Morton of Cicero, Cicero, Ill.
- 1938 -- Ashland, Ky.
- 1939 -- Athens, Texas
- 1930 -- Athens, Texas

(The names of the specific school in Kansas City or any

of the other larger towns are not available in the University of Chicago files).

In 1930 the athletic associations of most of the states requested that the tournament be dropped because the season had become too long. So, in 1931, Stagg started a Cook County Invitational tournament which was also held in the early spring after the state finals in Champaign.

Champions:

- 1931 -- Morton of Cicero
- 1932 -- Downers Grove
- 1933 -- Lane Tech

This tournament was dropped after 1934. It had become too much of a problem selecting schools to compete; all schools in Cook County could not be invited because the field would then be much too big. So the tournament was limited to Chicago Public Schools and it was decided to hold the meet during the Christmas holidays, again

because most of the schools felt that their season was too long.

The champions:

1934 -- Lane Tech

1935 -- Farragut

1936 -- Calumet

1937 -- Parker

1938 -- Crane

1939 -- Austin

1940 -- DuSable

1941 -- DuSable

1942 -- No tournament

1943 -- No tournament

1944 -- Senn

1945 -- Lane Tech

1946 -- Tilden Tech

* * *

Officials for this year's Illinois Tech tourney will be George Boyle, John Boyle, Edward Bronson, Elliot Hasan, and Tommy Kouzmanoff.

* * *

-more-

because most of the schools felt that their season was too long.

The champions:

- 1934 -- -- Lane Tech
- 1935 -- -- Farragut
- 1936 -- -- Calumet
- 1937 -- -- Parker
- 1938 -- -- Crane

IN THE FUTURE

CHIEF -- Research on a variety of military and naval systems will have a major impact on the development of the future. The Navy is sponsoring an exhibition on the subject, "Naval Systems of the Future," at the Naval Academy in Annapolis, Maryland, from January 1 to 15, 1961.

Commander L. L. Spear, director of research and development at the Naval Academy, has arranged the exhibition. The exhibition will be held in the main building of the Academy.

Started naval academy in 1800, becoming a naval reserve school in 1845. The Academy is now in the process of being converted into a major center for research and development on subjects such as the development of new weapons, the design of new ships, and the development of new tactics.

Five of his books, "The Future of the Navy," "The Future of the Air Force," "The Future of the Army," "The Future of the Space Force," and "The Future of the Intelligence Community," are available from the Naval Academy Press.

CHICAGO -- In the largest all-school election in the history of Illinois Institute of Technology 20 students were elected class officers for the second semester at a two-day voting period Wednesday and Thursday (December 15,16).

Officers for all four classes were selected from a total of 76 candidates.

Polls record a 1,100 student vote, or 56 per cent of the 2,400 eligible voters.

Elections followed a two-week period of campaigning, and slogan-making. Each candidate had a definite platform and was given occasion to define it at a pre-election school assembly.

During the voting period, office seekers made speeches, paraded with posters, beat drums, threw confetti and performed other vote-getting antics.

Seniorsclass officers are:

William Dassie, 7822 Elmgrove drive, Elmwood Park, president; Wayne D. Johnson, 413 West 56th place, vice president; Arnold P. Brown, 8322 Luella avenue, treasurer; Ann Allman, 7700 Saginaw avenue, secretary; Melvin Polacek, 4600 North St. Louis avenue, social chairman.

Junior class officers are:

Ramon Klitzke, 7338 Summerdale, president; Ira E. Graham, 6415 South California avenue; vice president; Robert E. Duke, 6925 South Emerald, treasurer; Mary Margolis, 3741 West Eastwood drive, secretary; John Christian, 260 West 65th street, social chairman.

Sophomore class officers are:

Sherman Roberts, 7606 Bosworth, president; Lee O. Richards, 207 Pine street, Huntingdon, Pennsylvania, vice president; Donald Cumming, 1405 Jean Court, Jacksonville, Florida, treasurer; Ursula Lier, 1033 North Menard, secretary; Gerald Maatman, 11924 Yale avenue, social chairman.

Freshman class officers are:

Donald Trezök, 1309 South Park avenue, president; Keith Wingate, 2026 Washburne, Topeka, Kansas, vice president; Robert Reischauer, 515 East Main, Ottawa, treasurer; Kara Kern, 2422 East 74th street, secretary; Constance Olson, 5742 South Bishop, social chairman.

FOR RELEASE: Immediate

CHICAGO -- Pairings for the Second Annual Illinois Tech Prep Basketball Tournament were announced today by John J. Schommer, director of athletics.

Thirty-one Chicago public high schools have entered the meet at the International Amphitheatre from December 27 through January 1.

Marshall, defending champion and again one of the top favorites, will meet Englewood in the final contest of the upper bracket at 9 p.m. Monday. Vocational, runner-up last year and also in the upper bracket, goes against Gage Park at 3 p.m. Monday.

Senn and Lindblom, third and fourth-place winners, respectively, in 1947-48, will play in the lower bracket. Senn meets Morgan Park in the first round at 5 p.m. Tuesday and Lindblom battles powerful Calumet at 2 p.m. Tuesday.

illinois tech tourney pairings, page two

Marshall and Vocational face the challenge of such respected quintets as Tilden, Farragut, Harper, and Amundsen in the upper bracket. In the lower bracket, Senn and Lindblom must contend with a host of strong teams -- Lake View, Tuley, Calumet, Crane, Hirsch, and Harrison.

Carver high school (formerly Corliss) drew the only first round bye. Carver will not see action until Wednesday afternoon when it meets the winner of the Hyde Park-Kelly match that opens the meet at 2 p.m. Monday.

Afternoon and evening sessions will be held Monday, Tuesday, Wednesday, and Thursday, with the semi-finals to be run off Friday afternoon December 31 and the finals on Saturday evening January 1.

Tickets will be available at the door. Admission has been set at 60 cents, tax included, for each session, or \$2, plus tax, for the entire tournament. There will be no reserved seats.

The Amphitheatre at 42nd and Halsted streets can accomodate basketball crowds of 8,500 people. It is conveniently reached by either street car or elevated. Free parking space for 4,000 cars will be provided.

The complete pairings:

Monday December 27

Game 1 -- 2 p.m. -- Hyde Park vs Kelly

Game 2 -- 3 p.m. -- Gage Park vs Vocational

CHICAGO -- Hyde Park and Kelly high schools open the Second Annual Illinois Tech Prep Basketball tournament at 2 p.m. Monday in the International Amphitheatre, and before afternoon and evening sessions are over, a dozen more of the 31 Chicago public high schools entered in the mammoth holiday meet will see action.

Eight games Tuesday complete the first round. Afternoon and evening sessions continue through Wednesday and Thursday. The semi-finals will be run off Friday afternoon December 31 and the championship and third-place contests Saturday evening January 1.

Marshall, last year's Illinois Tech champion, Vocational runner-up to Marshall in 1947-48, and Lake View, entering the tournament for the first time, rate as top favorites, but at least half of the teams in the huge field are given a chance to go all the way.

-more-

Marshall and Vocational, both in the upper bracket, face the challenge of Tilden, Harper, Gage Park, Farragut, Waller, and Hyde Park. A dogfight is assured in the lower bracket where Lake View must contend with such respected quintets as Lindblom, Calumet, Crane, Hirsch, Senn, Harrison, and Tuley.

Vocational and Gage Park will have it out Monday at 3 p.m. following the Hyde Park-Kelly match. The Vocational team will be led by Don Sabo, center who was named to the all-tournament team last year, and Ross Pohlo, an excellent guard.

Marshall, led by its brilliant Irving Bemoras who set a number^{of}/tourney scoring records and placed on the 1947-48 all-star team, meets Englewood in the first round at 9 p.m. Monday.

Phillips and Amundsen take the floor at 4 p.m. Monday followed by Dunbar and Waller at 5. Farragut and Harper open the evening session at 7 and Tilden and Parker meet at 8.

Tuesday's schedule follows:

1 p.m., Roosevelt vs Foreman; 2 p.m., Lindblom vs Calumet; 3 p.m., Crane vs Washburne; 4 p.m., DuSable vs Hirsch; 5 p.m., Senn vs Morgan Park; 7 p.m., Harrison vs McKinley; 8 p.m., Lake View vs Kelvyn Park; 9 p.m., Bowen vs Tuley.

Carver (formerly Corliss) drew the only first-round bye and will not see action until 1 p.m. Wednesday against the winner of the Hyde Park-Kelly contest.

Illinois tech prep tourney, page three

The Amphitheatre at 42nd and Halsted streets can accommodate basketball crowds of 8,500 people. It is conveniently reached by either street car or elevated. Free parking space for 4,000 cars will be provided.

Note to Editors:

Attached for your information is the text of a keynote address delivered by Raymond T. O'Keefe, vice president of the Kropp Forge Company, at 1:30 p.m. Tuesday, December 28, at the three-day Chicago Area Career Conference at Illinois Institute of Technology.

The conference is sponsored by the Chicago Technical Societies Council and the Chicago Sun-Times in cooperation with Illinois Institute of Technology.

--Jim Armsey

KEYNOTE ADDRESS

by

Raymond T. O'Keefe, Jr., Vice-President, Kropp Forge Company
Greater Chicago Career Conference, December 28, 1948

Good afternoon, ladies and gentlemen. Your presence here, today, is truly inspiring.....not only because you are gathered together in numbers with a common interest and a common goal.....but because you are sacrificing a generous portion of your Holiday Vacation period to further pursue your quest for knowledge and information.

Through the combined auspices of the CHICAGO SUN-TIMES, the CHICAGO TECHNICAL SOCIETIES COUNCIL, and ILLINOIS INSTITUTE OF TECHNOLOGY, thousands of you will, during the next few days, be thrown into personal contact with leaders of virtually every branch of the sciences...the arts...commerce and industry. Meeting these leaders face-to-face will give you an unusual opportunity to discuss your career problems on a personal and individualized basis.

You'll want to know the limitations of jobs in your chosen fields. Are certain fields overcrowded? What are the plans for expansion of these fields? What are the starting salaries? You'll be concerned, also, with questions relating to further study once you have completed high school or junior college.

The Chicagoland Area is generally acknowledged to be the center of our nation's technical "know-how." Nowhere else can be found the concentrated wealth of educational facilities and broad technological resources as compiled by the Territorial Information Department of the Commonwealth Edison Company. They are:

- Great concentration of Colleges and Universities
- University laboratories for research and industrial problems
- Thorough technical training in Colleges and Secondary Schools
- Highly Developed Vocational Training in the Public Schools
- Abundant Practical Training in the Evening Schools
- Industry-Sponsored Educational Programs
- A University Seminar for Business Executives
- Outstanding Professional Training at University Level
- Business Training of Highest Calibre at University Level
- Industrial and Scientific Libraries and Museums

The Area's ideal geographical location has made it a great transportation center.....a great agricultural center.....and a great manufacturing center. You young men and women of today have at your fingertips all of the strategic resources that have been developed through approximately a century and one half of careful planning...and through the enterprise and courage of the generations that have preceded you.

Most of you realize that from the day that you first entered school, you have been preparing yourself for a useful career in the society of which you are a part. Under the guidance of your parents and your teachers a great deal of thought and preparation has already been undertaken to help develop your interest in a particular career or calling. Perhaps for many of you the experiences gained in these informal seminars will help crystallize for you a desire to continue or to enter a particular field of endeavor. Others of you may find that the road ahead demands additional schooling or specific on-the-job training not envisioned until now.

The facilities provided for you during this Conference embrace a roster of sixty vocations and professions ranging alphabetically all the way from Accounting to Zoology. A total of one hundred and seventy two qualified conference leaders have freely given of their time and energies to meet here with you...and to listen as well as to advise. These men and women merit wide respect and renown in their many fields. Among them you can well find many who now or who will one day head the business or industrial company with which you become associated.

To my knowledge this GREATER CHICAGO CAREER CONFERENCE is the largest and most comprehensive effort ever undertaken in the realm of vocational guidance and counselling. It has won the support and unqualified endorsement of such eminent educational leaders as Dr. Harold C. Hunt, Superintendent of Schools, Monsignor D.F. Cunningham, Superintendent of Parochial Schools for the Archdiocese of Chicago, Edward B. Simon, County Superintendent of Schools, and Dr. Henry T. Heald, President, Illinois Institute of Technology.

As most of you already know, Mayor Martin H. Kennelly, has signed an official proclamation declaring the week of December 26-January 2nd as "CAREER WEEK IN CHICAGO."

As you leave this auditorium and enter the conference rooms you can be well assured that this project...planned in infinite detail over a period of many months...and with the active participation of hundreds

of public spirited citizens.....will become an annual event to which you and many thousands more will be invited in the future.

I am confident that a large number of you will look back upon this experience with much pleasure and happiness...and that in the years to come...you will participate as a leader in your field...giving your support to such a Conference in the interests of your own sons and daughters.

CHICAGO -- Dr. Mary Baeyertz has been named assistant chairman of the Metals Research Department of Armour Research Foundation of Illinois Institute of Technology. The appointment, announced by William E. Mahin, chairman of the department, is effective January 1, 1949.

Dr. Baeyertz, author of the recently-published book, "Non-metallic Inclusions in Steel," has been with the Foundation as a senior metallurgist since March 1, 1947. Previously she was supervisor of research at the South Works of the Carnegie Steel Corporation.

Dr. Baeyertz received her master's and doctor's degrees from Columbia University. She was awarded her bachelor's degree from Smith College.

In her new position, Dr. Baeyertz will assist Mr. Mahin in general scientific supervision of numerous fundamental and applied research programs for industry and government agencies.

CHICAGO -- A total of \$33,913.50 was invested in 136 scholarship awards at Illinois Institute of Technology during the current semester, Clarence E. Deakins, dean of students, announced today.

Thirty-six of the awards, representing \$9,380.00, are unendowed or Institute paid scholarships. The remaining 100 awards, totaling \$24,479.50, have been provided by endowed sources.

All of the unendowed scholarships were awarded freshmen, seven of whom were foreign students. Awards were made on the basis of high school scholarship, Institute sponsored examinations, and personal interviews.

Endowed scholarships, provided by 25 organizations, industries, or individuals include:

La Verne Noyes, \$2,022.50; Western Actuarial Bureau, \$10,725; William J. Cook, \$3,582; Fairbanks Morse, \$1,500; Chicago Molded Products, \$750; Kemper Insurance, \$600; Ekco Fund, \$700.

CHICAGO -- Illinois Tech's basketball team swings into action Thursday night (January 6) after a three-week holiday rest when the Techawks entertain George Williams college. The contest is scheduled for 7:15 p.m. in the Illinois Tech gym, 32nd and Dearborn streets.

The rivals split a two-game series last year, each team winning on its home floor. The home floor edge establishes the Techawks as slight favorites Thursday.

With Center George Scalamera maintaining an average of more than 15 points per game, Illinois Tech won three and dropped three before the Christmas vacation.

Coach Ed Glancy will open with Scalamera at center, and Bob McCue, clever freshman playmaker, and Leo Kiley at guards. Either Bob Leiser or Carl Matson will pair with Capt. Carl Bergstrom at the forwards.

CHICAGO -- Illinois Tech's swimming team is expected to capture its second victory of the season Thursday night (January 6) when the Techawks go up against the Loyola Ramblers.

The meet is scheduled for 8 p.m. in the Loyola university pool, 6525 North Sheridan.

Although Illinois Tech dropped two of its three pre-holiday meets, both losses were administered by strong opponents -- Chicago and Beloit College.

Techawks Coach John Ahern will rely mainly on his three standouts, Capt. Jim McNerney, Ray Klitzke, and Len Carlman.

McNerney is undefeated this winter in the 60 and 100-yard free-style sprints. Klitzke, diving artist, suffered his first loss of the season by two points at Beloit. Carlman, a sophomore, broke the 3-year-old pool record for the 200-yard breast stroke at Beloit.

FOR RELEASE: Immediate

CHICAGO -- Expansion of research programs by industrial sponsors is indicated by the 1947-48 annual report of Armour Research Foundation of Illinois Institute of Technology, released today.

Dr. Haldon A. Leedy, director of the Foundation, reports that its sponsored research service was the most extensive and active in its 12-year history, with an approximate increase of 25 per cent in volume over the previous high year (1946-47).

"More than 110 industrial organizations and 20 government agencies were served by the Foundation during the past fiscal year," Dr. Leedy said, "and the professional staff was augmented by almost one-third."

The Foundation was established in 1936 to render a confidential research and engineering service to industry.

All three of the Foundation's divisions--Research, International and Magnetic Recorder--showed an increase over the previous year. A heavier program of public service activities and fundamental research was assumed by the Foundation itself, with 44 projects of this type.

"Projects run the gamut of scientific investigation, from reduction of noise in calculating machines to rockets and rocket mechanisms," Dr. Leedy said.

The 185 projects described in the report form a partial list of those undertaken during the year in applied mechanics, chemistry and chemical engineering, ceramics and minerals, electrical engineering, mechanical engineering, metals and physics.

"A monthly analysis of dustfall at 24 sampling stations in Chicago by the Foundation's Fine Particles Laboratory is an example of public service activity," Dr. Leedy pointed out. This work is in cooperation with the Chicago Smoke Abatement Program.

The Foundation also is joint sponsor, with the Greater Chicago Noise Reduction Council, of a year-long study of city noises and their effects on people. Noises in different/^{frequency}bands, as well as daily and annual variations of total intensity, are being measured."

The International Division completed its first full year of operation as a separate division, although the Foundation has done international research for eight years.

Two examples of research by this division cited by the director are:

A new, high-melting industrial wax, made from henequen waste and estimated to be worth \$20 million to Mexico in annual exports, and a stable dry tortilla flour, the first acceptable to the Mexican public

Research projects for several other countries are now in progress.

The Magnetic Recorder Division administers the licensing of the Foundation's patents in that field to a total of 55 firms. Stereophonic (three-dimensional) sound and a new recorder using a wide, endless belt made of paper are examples of successful research by this division. A third achievement was the successful bonding of magnetic sound track on 8-mm motion picture film, a development making amateur motion pictures in sound commercially practical.

One result of scientific investigations by the Research Division is a method of making sturdy, low-cost furniture from a resin-impregnated pulp preform in but a few minutes. Other developments described in the report are a new testing machine to study abrasion resistance in metals and a new warp sizing process for textiles.

A gross expenditure of \$3,400,000 for sponsored research for the 1947-48 fiscal year was reported by Dr. Leedy.

Among special service laboratories and activities operated during the year were the Riverbank Acoustical Laboratories, the Precision Mechanical Measurements Laboratory and the National Registry of Rare Chemicals. Fundamental research included study in the fields of extreme pressure and sound transmission and sound absorption.

The staff of the Foundation now totals 640 persons, approximately two-thirds of whom are scientists and engineers.

FOR RELEASE: Immediate

CHICAGO -- The eighteenth running of the annual Illinois Tech Relays -- largest indoor track meet in the nation -- will be held Saturday March 12 in the University of Chicago Fieldhouse, John J. Schommer, director of athletics at Illinois Tech, announced today.

Sixty-one universities, colleges, and junior colleges, and ten Chicago public and Catholic high schools participated in the 1948 meet. Illinois won the university title for the second straight year and Michigan Normal took its third successive college division crown.

The Illinois Tech games were begun in 1929 and, except for the war years, have been held annually since that time.

CHICAGO -- Eastman Kodak Company of Rochester, New York, has been licensed by Armour Research Foundation of Illinois Institute of Technology to manufacture and sell motion picture film with a magnetic sound track.

Kodak will sell film already coated with a magnetic sound track and will add a track to exposed film for both professional and amateur use, according to Carl Titus, director of the Foundation's Magnetic Recorder Division, which administers the licensing of the Foundation's magnetic recording patents.

Kodak joins 55 other licensees who are manufacturing and selling magnetic recording equipment based upon Research Foundation patents. Three companies--Ampro Corporation, Bell and Howell Company and Revere Camera Company--are planning to manufacture motion picture projectors which incorporate magnetic sound, Titus said. All three are Foundation licensees.

The modern magnetic recorder was developed in the Armour Research Foundation laboratories by Marvin Camras, Illinois Tech graduate and now research physicist at the Foundation.

CHICAGO -- Illinois Tech and Chicago renew an intense basketball rivalry at the University of Chicago Fieldhouse Saturday evening (January 8).

Ed Glancy's Techawks took a 56 to 53 thriller from the Maroons in the season's first meeting of the two schools. That contest was played December 10 before an overflow crowd in the Illinois Tech gym.

Last year Illinois Tech and Chicago split two games, each winning on its home floor.

Center Sherry Rowland and Forward Duncan Hanson, two Maroon sharpshooters, are expected to lead the Chicago offensive. Illinois Tech's big guns are George Scalamera, husky center who has averaged more than 15 points per game, Capt. Carl Bergstrom, lanky forward, and Bob McCue, playmaking guard.

The game will start at 8 p.m.

CHICAGO-- Madeline L. Liggins, daughter of Mrs. Elizabeth Turner, 6208 Prairie avenue, is one of 18 Chicago high school students to receive a one-year scholarship to Illinois Institute of Technology, according to a list released by Fred R. Travis, director of admissions.

Of the 100 applicants who took examinations in the semi-annual Illinois Tech freshman scholarship competition, the 30 highest scoring students were personally interviewed by the Institute's scholarship committee. Eighteen of those interviewed were awarded scholarships on the basis of character, personality, integrity, and industry.

Miss Liggins, 17, is a second-semester senior at Englewood high school and ranks fifth in her class of 156. She is a member of the National Honor Society, school newspaper staff, orator's club, and Girls Athletic Association.

At Illinois Tech she intends to major in social sciences in preparation for a high school teaching career.

CHICAGO -- The newly-formed Chicago section of the Institute of Aeronautical Sciences will elect officers at a meeting on the campus of Illinois Institute of Technology Tuesday night (January 11).

H.V. Hawkins, professor of civil engineering at Illinois Tech, is chairman of the present steering committee which is to be succeeded by a governing group composed of a chairman, vice chairman, treasurer, secretary, an eight-man advisory board, and a representative to the national nominating committee for area councilors.

Dr. John T. Rettaliata, dean of the division of engineering at Illinois Tech, will talk to the group on "Jet Propulsion". Dr. Rettaliata is a widely-recognized authority on both jet propulsion and gas turbines.

The Chicago section was organized November 11, 1948. One-hundred and seventy-five members and guests attended the first meeting at Illinois Tech.

An optional dinner at 6:30 p.m. in the North Student Union will precede the lecture and business meeting, which will take place at 8 p.m. in the auditorium of the Metallurgical and Chemical Engineering Building, 33rd and State streets.

Morton Earl Goldberg, 7018 Clyde; electrical engineering;

Hyde Park.

Clarence Peter Jorgensen, 4817 Lake Park; mechanical

engineering; Hirsch.

Paul Marshall Levine, 937 Hyde Park boulevard; chemical

engineering; Hirsch.

Harry Louis Newman, 4909 Cottage Grove; industrial

engineering; Realgymnasium, Ingelheim, Germany.

Lewis Roy Plast, 7239 St. Lawrence; fire protection and

safety engineering; Hyde Park.

Richard Potocki, 8844 Muskegon; electrical engineering;

Bowen.

John Joseph Scopelite, 9323 South Ridgeland; mechanical

engineering; Bowen.

Robert Dwight Sickafoose, 1520 East 59th street; chemical

engineering; Hyde Park.

John Edwin Tobin, 11256 South Artesian; chemical engineer-

ing, St. Ignatius.

Sophomores (2nd term):

Bertram Leonard Amstadter, 5405 Ingleside; industrial engineering; Hyde Park.

Melvin Mayer Friedlander, 1969 East 73rd Pl.; mechanical engineering; Tilden Tech.

Kozo Fukuda, 7537 South Ellis; mathematics; Garfield, Los Angeles.

Donald F. Goldsmith, 1122 East 46th street; business and economics; Hyde Park.

Robert Wm. Larson, 7210 Vernon, electrical engineering; Calumet.

Robert G. Mather, 5410 Dorchester; architecture; Community Consolidated, Plainfield.

John Walter Matushek, 8017 Euclid; mechanical engineering; St. Leo.

Edward Moore, 635 East 41st street; business and economics, St. Phillips.

Russell Marvin Reubelt, 4119 South Ellis; business and economics, Hirsch.

Gregory Wm. Streb, 7524 Ridgeland; mechanical engineering; Bowen.

Sophomores (3rd term):

Edmund George Janssen, 8341 Paxton; chemical engineering; Tilden Tech.

Richard Patterson Menaul, 5801 Blackstone; electrical engineering; University.

Edward Marshall Rosen, 4428 1/2 Drexel Blvd., Physics, Hyde Park.

Robert T. Summers, Jr., 5434 Woodlawn, electrical engineering; Lanphier, Springfield.

Freshmen (2nd term):

Werner Louis Frank, 5459 Greenwood; mathematics; Hyde Park.

Charles Rheinold Gentzel, 1452 East Marquette Blvd.; business and economics; Hyde Park.

Gerhard Roland Hildenbrand, 3336 South Wood;; chemical engineering; Harrison Tech.

Ernest Hubert Johnson, 218 East 109th street; electrical engineering; Fenger.

Lawrence John Mente, 8225 South Ingleside; chemical engineering; St. Rita.

Robert Nordin, 9627 Escanaba; mechanical engineering, Bowen

William Coulbourn Smith, 917 East 62nd street; chemical engineering; Hyde Park.

Charles H. Stade, 1522 East 66th Pl., chemical engineering; Hyde Park.

Jerome Norton Weiland, 6716 Merrill; chemical engineering; Hyde Park.

Freshmen (1st term):

Frank Kozin, 1373 East 55th street; mechanical engineering; Hyde Park.

Masaya Richard Kuniyuki, 3991 South Ellis; electrical engineering; Honolulu, Hawaii.

Faith Shirley Reed, 9424 Tully; biology; Oak Lawn.

Donald G. Saile, 1036 East 47th street, chemical engineering; Tilden Tech.

south side honor students-- page 11

Robert Betz, 3256 South Lowe; biology; De LaSalle.

James Philip Stebbins, 10754 South Edbrooke; electrical engineering; St. Leo.

Wayne Charles Wiechmann, 7758 Prairie; electrical engineering; Beecher Community, Beecher.

Herbert Alfred Wolf, 6611 Kimbark; electrical engineering; Hyde Park.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street

Chicago 16, Illinois

CALUMET 9600

Mailed: January 7, 1949
FOR RELEASE: Immediate

CHICAGO-- One-hundred and fifty six southwest side student at Illinois Institute of Technology have received recognition on the deans' honor list announced today by John T. Rettaliata, dean of engineering, and John Day Larkin, dean of liberal studies.

The list is composed of all students who received a grade average above 2.00 (B). Students with an average between 2.50 and 3.00 (B plus to A) are accorded first honors and those between 2.00 and 2.49 (B to B plus) second honors.

First honor students, with home addresses, major fields of study, and high schools from which they were graduated, are:

Seniors (8th term), now graduates:

Robert Francis Betz, 3256 South Lowe; biology; De LaSalle.

Glen Arthur Borling, 7830 Prairie; electrical engineering;

Calumet.

Jova Cohn, 6410 South May; electrical engineering; Harper.

Sherman Z. Dushkes, 8024 South Honore; mechanical engineer

ing; Calumet.

William Davis Gauthier, 7757 South Carpenter; electrical engineering; Calumet.

outhwest side honor students-- page 2

Robert M. Kelliher, 9926 South Parnell; architecture; Pullman
Tech.

Norman A. Kenny, 6137 South Peoria; fire protection and
safety engineering; Englewood.

Stanley C. Mikszta, chemical engineering; 6453 South
Sacramento; Harper.

Robert F. Scheibel, 8313 South Elizabeth; mechanical
engineering; Calumet.

Edward Svereika, 4229 South Campbell; mechanical engineering;
Kelly.

Robert E. Tannehill, 9538 South Seeley; chemical engineering;
Lakewood, Ohio.

Seniors (2nd term):

John Farquhar, 11209 Hermosa; chemical engineering; Morgan
Park,

Edward F. Koncel, Jr., 5005 South Damen; electrical engineer-
ing; Gage Park.

James S. Somerville, 467 West Winneconna parkway; business
and economics; Calumet.

Juniors (2nd term):

William H. Abbott, Jr., 3240 West 65th place; electrical
engineering; Edwin Denby, Detroit.

Robert W. Amstutz, 6923 South May; electrical engineering;
Mt. Carmel.

Jack Leroy Bright, 5629 South Christiana; business and
economics; Englewood.

Jon R. Morlen, 7834 South Peoria; chemical engineering;
Moore's Hill, Indiana.

Robert T. Nelson, 153 West 116th street; chemical engineer-
ing; Tilden Tech.

Ralph E. Norby, 5742 South Morgan; mechanical engineering;
Englewood.

David J. Tammings, 258 West 110th place; architecture;
Pullman Tech.

William R. Thayer, 7225 Emerald; industrial engineering;
Morgan Park.

Hugh W. Wood, 6522 Lafayette; electrical engineering; Hyde
Park.

Juniors (1st term):

Clement L. Conklin, 10810 Eberhardt; mechanical engineering;
Pullman Tech.

Otto J. Hausknecht, 2340 South Homan; chemical engineering;
Farragut.

Joseph F. Moynihan, 8234 South Elizabeth; electrical
engineering; Mt. Carmel.

Sophomores (2nd term):

Robert F. Domagala, 5224 South Menard; metallurgical
engineering; Kelly.

Leslie C. Hardison, 6020 South Normal; mechanical engineer-
ing; Tilden Tech.

Frank B. Kelleher, 3501 Newcastle; electrical engineering;
Fenwick, Oak Park.

Harry W. Lamberty, 6342 South Ada; electrical engineering;
Harper.

James A. Mason, 1411 South Kostner; chemical engineering;
South Side, Newark, New Jersey.

John G. Mc Coy, 14830 South Keeler; electrical engineering;
Thorton Township, Midlothian.

Keith E. Mc Kee, Chicago Heights; chemical engineering;
Bloom Township.

Robert A. Paluchowski, 3335 West 62nd place; chemical
engineering; Lindbloom.

William P. Shefcik, 7718 South Wood; chemical engineering;
St. Leo.

William W. Widule, 10605 South Leavitt; physics, Morgan Park

Sophomores (1st term):

George A. Forster, 7729 South Throop; electrical engineering
St. Leo.

Paul S. Krc, 5234 South Wolcott; electrical engineering;
Lindbloom.

Raymond J. Lyons, 9455 Elizabeth; chemistry; St. Leo.

Freshmen (1st term):

William L. DeGroff, 354 West 74th street; electrical
engineering; Tilden Tech.

Donald J. Hoefler, 6552 South Sacramento; electrical
engineering; Lindbloom.

Alan B. Woodward, 3618 West 69th street; chemistry;
Lindblom.

southwest side honor students-- page 5

Second Honor students

Seniors (2nd term):

Ernest A. Baldini, 9833 South Avers; electrical engineering;
Southeastern, Detroit.

Gloria M. Cibulskis, 2516 West 69th street; home economics,
St. Casimir Academy.

Bruno P. Conterato, 12231 Union; architecture; Pullman Tech.

William F. Donovan, 8219 South Wood; mechanical engineering;
Tilden Tech.

Frank Gromen, 8209 South Bishop; chemical engineering;
Calumet.

Melvin J. Hine, 10505 Lafayette; chemical engineering;

Fenger.

Donald J. Jutzi, 9651 South Damen; chemical engineering;

St. Leo.

Casimir Adalbert, 8749 South Morgan; chemical engineering;

Weber.

Paul A. Larson, 4600 South Prospect, mechanical engineering;

Morgan Park.

Vernon W. Lester, 10224 South Aberdeen; mechanical engineer-
ing; Calumet.

Joseph R. Mc Cahill, 7210 South Maplewood; business and
economics; St. Rita.

William P. Mc Donough, 7715 South Paulina; mechanical
engineering; Tilden Tech.

Eugene A. Nitz, 2108 South 59th avenue; mechanical engineer-
ing; Morton, Cicero.

Donald W. Stearns, 7951 South Trumbull; architecture;
Englewood.

Ralph B. Sullivan, Jr., 2438 Cochran; fire protection and
safety engineering; Blue Island.

Eugene P. Virtue, 533 West 65th place; mechanical engineeri
ing; Parker.

Edward J. Yodwolkis, 1015 West 61st street; mechanical
engineering; Englewood.

Seniors (1st semester):

Charles W. Allen, 6610 South Harvard; electrical engineering;
Stuyvesant.

Carl W. Bergstrom, 11248 Indiana; mechanical engineering;
Fenger.

Anthony J. Christopher, 10244 Perry; business and economics;
Fenger.

Florence M. Dunke, 923 West 85th street; home economics;
Calumet.

John Dvorscek, 11632 Eggleston; mechanical engineering; Fenger

Donald Eckert, 9301 South Ada; chemical engineering; St. Rita

John G. Earhart, 10136 South Green street; fire protection
and safety engineering; Fenger.

John D. Finn, 3705 West 62nd place; mechanical engineering;
Tilden Tech.

Arnold G. Goudreau, 2843 West Pershing road; industrial
engineering; Niagara, Wisconsin.

Joseph E. Gaske, 2404 South Karlov; chemistry; Harrison Tech.

Charles G. Harnach, 3722 West 61st street; electrical
engineering; Lindblom.

Nicholas A. Kedo, 4751 South Kedvale; industrial engineering;
Tilden Tech.

Henry W. McGee, 58 West Garfield boulevard; political science;
Lincoln, Kansas City.

John G. Morgan, 7931 South Sangamon; mechanical engineering;
St. Leo.

Robert E. Morgan, 2523 West 65th street; electrical engineering;
Austin.

Joseph F. Oleo, 2622 Stark; mechanical engineering; Kelly.
Warren S. Spoor, 11808 South State; electrical engineering;
Fenger.

Salvatore W. Terranova, Chicago Heights; mechanical
engineering; Bloom Township, Chicago Heights.

Lawrence P. Trost, 5527 South Marshfield; mechanical
engineering; De LaSalle.

Michael A. Videla, 5520 South Oak Park; industrial engineering;
Tilden Tech.

Edwin G. Voogt, 10401 Wallace; mechanical engineering;
Chicago Christian.

John T. Washburne, 8036 Sangamon; mechanical engineering;
Morgan Park.

Henry C. Weber, 6450 S. Ashland; chem. engineering; Lindblom
Juniors (2nd term):

Robert F. Abramson, 8919 South May; electrical engineering;
Calumet.

David B. Boies, 10605 South Wood; chemical engineering;
Morgan Park.

Wyatt P. Coon, 3320 West Marquette Rd., chemical engineer-
ing; Lindblom.

Edward D. Finnegan, 7500 South Sangamon; mechanical
engineering; Calumet.

Harold C. Jones, 931 West 83rd street; electrical engineer-
ing; Tucson, Arizona.

Charles J. Kolar, 2852 South Hamlin; mechanical engineering;
Farragut.

Frank A. Morgan, 2519 West 65th street; mechanical engineer-
ing; Austin.

Joseph H. Nelson; 6604 South Green street; architecture;
Harper.

Frank D. Sammons, 1752 West Garfield; electrical engineering
Morgan Park.

Eugene O. Schoelkopf, 7619 South Hermitage; business and
economics; Calumet.

Albert R. Seskowski, 3951 South Talman; industrial engineering;
Tilden Tech.

Frank W. Simon, 4465 South Wells; industrial engineering;
De LaSalle.

John B. Singler, 1615 West 104th Pl.; electrical engineer-
ing; Morgan Park.

James E. Tracy, 1334 West 77th street; electrical engineerin
Calumet.

Arthur W. Von Fange, 5241 South Racine; mechanical engineer-
ing; Deshler, Nebraska.

Rudolph M. Zepeda, 5109 South Mayfield; architecture; Kelly.

Edward A. Zietz, 5757 South Morgan; fire protection and safety engineering; Gage Park.

Peter John Baier, Jr., 8051 South Ada; mechanical engineering; St. Leo.

Arthur Chodrof, 6400 Sangamon; electrical engineering; Parker.

Alfred P. Hummer, 6545 South Morgan; mechanical engineering; Tilden Tech.

Wayne D. Johnson, 413 West 56th Pl., mechanical engineering; Englewood.

Clifford I. Mock, 2608 West 42nd street; chemical engineering; Lindblom.

William J. Padgett, 554 West Cullerton; electrical engineering; Lane Tech.

Ralph S. Partridge, 3306 West 64th street; electrical engineering; Oshkosh, Wisconsin.

Irene E. Radvilas, 1024 West 84th street; psychology; Calumet.

Richard R. Reedy, 9621 South Damen; chemical engineering; Quigley.

Benjamin S. Roscrow; 11317 Fairfield; industrial engineering; Morgan Park.

Edward R. Schinke; 9632 Parnell; mechanical engineering; Fenger.

John A. Spix, 6129 South Damen; electrical engineering; Austin.

Sophomores (2nd term):

James J. Blastik, 3006 South Kildare; mechanical engineering; Farragut.

Joseph F. Bury, 2944 West 63rd street; electrical engineering;
Tilden Tech.

Loren R. Collins, 5246 South Cornell; electrical engineering;
Lexington, Nebraska.

Eugene W. Donnellan, 7746 South Honore; electrical engineer-
ing; St. Ignatius.

Robert E. Duke, 6925 South Emerald; fire protection and
safety engineering; Parker.

John Peter Dunne, 5747 South Fairfield; industrial engineer-
ing; St. Rita.

James V. Fitzpatrick, 3716 South Parnell; electrical
engineering; Tilden Tech.

Edward B. Frysinger, 5216 Blackstone; electrical engineering;
Edwards.

John A. Gradle, 2605 South Green; electrical engineering;
St. Ignatius.

Ira E. Graham, 6415 South California; fire protection and
safety engineering; Lindblom.

William Hanzel, 5119 South Albany; chemical engineering;
Gage Park.

Mark F. Hoyer, 8227 South Marshfield; psychology; Calumet.

Wilbur H. Knobloch, 6649 South Stewart; industrial engineer-
ing; Tilden Tech.

Chester Lawcewicz, 3949 South Talman; mechanical engineering;
Crane Tech.

Robert W. Lindgren, 6140 South Richmond; mechanical engineer-
ing; Lindblom.

southwest side students-- page 11

Walter G. Lormer, 7515 Yale; architecture; Calumet.

Robert J. Mac Donald; 318 Youngs; business and economics;

Joliet Township, Joliet.

Leroy W. Nero, 6528 South Ashland; electrical engineering;

West, Green Bay, Wisconsin.

Irvin C. Rebeschini, 11304 Forrestville; electrical engineer-

ing; Fenger.

Raymond G. Reiff, 1423 West 71st Pl., metallurgical engineer-

ing; De LaSalle.

Jack M. Schick, 10424 Calumet; fire protection and safety

engineering; Fenger.

Gerard L. Schultz, 6434 South Richmond; industrial engineer-

ing; Tilden Tech.

Charles G. Smith, 3023 Union; chemistry; St. Ignatius.

Ralph A. Staschke, 5007 South Karlov; electrical engineering;

Kelly.

Sophomores (1st term):

John A. Alexander, 6450 Normal; electrical engineering;

Parker.

William J. Brebach, 8643 South Wood; chemical engineering;

Calumet.

William J. Cadigan, 6218 South Campbell; chemical engineer-

ing; Harper.

Harold J. Gieffers, 6840 South Halsted; mechanical engineer-

ing; Parker.

Stanley J. Goslovich, 3426 West 60th street; electrical

engineering; Lindblom.

southwest side honor students-- page 12

Gerald E. Ragan, 4725 South Halsted; chemical engineering;
De LaSalle.

Gilbert O. Roessler, 5929 Marshfield; industrial engineering;
Lindblom.

William G. Ruthenberg, 2227 Prairie; electrical engineering;
Blue Island.

Edmund J. Sebastian, 5201 South Natoma; mechanical engineering;
Kelly.

Helen A. Tichy, 2506 West 50th street, biology, Gage Park.

Freshmen (2st term):

Marilyn J. Jensen, 3720 West 61st street; chemistry,
Lindblom.

Rolf H. Jensen, 2621 West 102nd street; fire protection and
safety engineering; Lindblom.

Gerald L. Maatman, 11924 Yale; metallurgical engineering;
Fenger.

Anton J. Pros, 2801 South Christiana; industrial engineering;
Farragut.

John Joseph Shefcik, 7718 South Wood; chemical engineering;
St. Leo.

Eugene R. Stachniak, 2736 South Kedvale; electrical engineering;
Farragut.

Lorraine E. Wach, 3326 West 66th Pl.; chemical engineering;
Lindblom.

Freshmen (1st term):

Raymond J. Arndt, 8428 South Carpenter; electrical engineering;
Mt. Carmel.

_more-

southwest side students-- page 13

Richard G. Fisk, 6552 South Spaulding; mechanical engineering; Lindblom.

William H. Grip, 1820 West 78th street; mechanical engineering; Calumet.

John Gvozdjak, 2538 North Wayne; mechanical engineering; Cosmopolitan.

Ernest E. Haack, 7628 South Maplewood; mechanical engineering; Harper.

Clarence M. Kunstmann, 5649 South Natoma; mechanical engineering; Tilden Tech.

Edward S. Lipinski, 3701 South Winchester; chemical engineering, Lindblom.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street

Chicago 16, Illinois

CALUMET 9600

Mailed: January 7, 1949
FOR RELEASE: Immediate

CHICAGO -- One hundred and fifty-five northwest side students at Illinois Institute of Technology have received recognition on the deans' honor list announced today by John T. Rettaliata, dean of engineering, and John Day Larkin, dean of liberal studies.

The list is composed of all students who received a grade average above 2.00 (B). Students with an average between 2.50 and 3.00 (B plus to A.) are accorded first honors and those between 2.00 and 2.49 (B to B plus) second honors.

First honor students, with home addresses, major fields of study, and high schools from which they were graduated, are:

Seniors (8th term):

Chester A. Chubinski, 2841 N. Spaulding; mechanical engineering; Lane Tech.

Earl F. Petz, Jr., 3000 N. Troy; mathematics, Roosevelt.

Robert L. Roderick, 1 S. William St., Mt. Prospect; electrical engineering; Arthington Heights Township.

-more-

Herbert M. Sachs, 2741 N. Francisco; electrical engineering;
Von Steuben.

Lionel Shub, 3144 W. 15th St.; electrical engineering; Manley.
Clayton W. Smith, 3803 W. Belden; biology; Schurz.

Lane L. Wolman, 4448 Kimball; electrical engineering; Lane.
Jacob Zelenietz, 1123 N. Christiana; mechanical engineering;

Tuley.

Seniors (7th term):

Ernest A. Brunauer, 4703 N. Albany Ave.; mechanical engineering; Vienna, Austria.

George D. Doland, 4307 Roscoe; electrical engineering; Schurz.

Bertil A. Engstrom, 941 N. Latrobe; mechanical engineering;
Lane Tech.

Henry J. Rebman, 5640 Windsor Ave.; electrical engineering;
Lane Tech.

Norri Sirri, 4400 N. Malden; electrical engineering; Schurz.

Juniors (6th term):

Edward S. Fajnor, 4704 N. Kilbourn; mechanical engineering;
Lane Tech.

Lawrence Margol, 4111 N. Bernard; electrical engineering;
Roosevelt.

Roland L. Menzl, 2524 N. Harding, chemical engineering; Lane.

Stewart Schlesinger, 2057 Pierce Ave.; mathematics; Von
Steuben.

Morton J. Shapiro, 4704 N. Sawyer; business and economics;
Von Steuben.

Juniors (5th term):

Robert H. Herman, 4816 N. Spaulding; biology; Roosevelt.

Benjamin Morris; 1352 N. Wolcott; psychology; Senior,

Beloit, Wisconsin.

Joseph J. Pope, 7001 N. Ozark Ave.; chemical engineering;

Taft.

Theodore Saltzberg, 1916 Wilmot; electrical engineering;

Tuley.

Martin Shatavsky, 4502 Sawyer; chemistry; Roosevelt.

Herbert S. Wille, 2152 N. Campbell; mechanical engineering;

Lane Tech.

Sophomores (4th term):

Jerome A. Brand, 1339 N. Spaulding Ave.; electrical
engineering; Tuley.

Nathaniel R. Goodman, 1430 N. Hoyne; mathematics; Tuley.

Leonard J. Inc, 2343 N. Mango; electrical engineering; Schurz.

Norman Mittman, 5024 N. Avers; physics; Von Steuben.

Morton Nemiroff, 2455 N. Ridgeway; chemical engineering;

Lane Tech.

Robert E. Parker, 4417 N. Meade; mathematics; Schurz.

Sophomores (3rd term):

Des Plaines

Arthur A. Anderson, Jr., 353 Ardmore Rd.; chemistry; Maine

Township.

William J. Christian, 4421 N. Kildare; chemical engineering;

Schurz.

Karel DeLeeuw, 5019 N. Hamlin; chemical engineering;

Roosevelt.

northwest side honor students, page four

Gerald H. Golden, 6539 N. Artesian; chemical engineering;
Lane Tech.

Ralph W. Johnson, 6024 Byron; electrical engineering; Lane.

Herbert S. Stein, 3257 Montrose; electrical engineering;

Roosevelt.

Freshmen (2nd term):

John A. Carlson, 5443 N. St. Louis; mechanical engineering;

Von Steuben.

John A. Granath, 4949 Lester Ave.; electrical engineering;

Taft.

Frank K. Halwax, 1723 N. Artesian; mechanical engineering;

Lane Tech.

Robert J. Macur, 5425 Schubert; civil engineering; Lane Tech.

Leonard P. Malinowski, 2114 N. Wolcott; electrical engin-

eering; Lane Tech.

Daniel Schiff, 2309 N. Sawyer; biology; Roosevelt.

Frank B. Sikorski, 4217 W. Roscoe; electrical engineering;

Holy Trinity.

Freshman (1st term):

Anita Bach, 1355 N. Homan; physics; Von Steuben.

Richard E. Kowalski, 2621 N. Francisco; electrical engin-

eering; Lane Tech.

northwest side honor students, page five.

Second honor students are:

Seniors (8th term):

Robert Baskin, 1322 N. Claremont; civil engineering; Tuley.

Lewis Berkowitz, 1912 N. Whipple; mechanical engineering;

Lane Tech.

Delbert E. Birr, 5529 Roscoe; mechanical engineering; Lane.

Joseph M. Coffey, 312 N. Central Ave.; English; Austin.

Edward B. Davis, 4651 N. Malden; mechanical engineering;

Westport, Kansas City, Mo.

Donald J. Eckert, 9301 S. Ada St.; chemical engineering;

St. Rita.

Warren P. Fabisch, 4812 Dakin; mechanical engineering; Schurz.

Herschell Franks, 2938 Palmer; industrial engineering; Austin.

Marlys Jean Hewitt, 4022 N. Monticello; chemistry; Roosevelt.

Irving H. Kovnat, 4530 Clifton Ave.; mechanical engineering;

Austin.

Leroy A. Kuston, 2037 N. Lacrosse; civil engineering; Lane.

Alvin Lieberman, 6049 N. Christiana; chemical engineering;

Lindblom.

Chester R. Lyngaas, Jr., 4321 N. Tripp Ave.; electrical
engineering; Lane Tech.

Howard W. Olsen, 5515 N. Major; mechanical engineering;

Austin.

George H. Reindl, 3317 Southport; chemistry; DePaul Academy.

George A. Schultz, Jr., 2509 W. Walton; mechanical engi-
neering; Austin.

Sidney Schyman, 4740 N. Karlov; mechanical engineering;

Roosevelt,

-more-

northwest side honor students, page six

Arthur P. Sommers, 1225 N. Monitor; electrical engineering;
Austin.

Charles E. Swanson, 2076 N. Campbell Ave.; mechanical
engineering; Lane Tech.

Eugene J. Szymiski, 3318 Ridgeway; mechanical engineering;
Lane Tech.

Jay Warshawsky, 3248 Wilson; electrical engineering; Roosevelt

Joseph Yaskon, 3564 Lyndale; electrical engineering; Tuley.

Seniors (7th term):

Bud R. Albanese, 4815 Belle Plaine Ave.; business and
economics; Schurz.

Louis Baker, 4446 W. Deming; chemical engineering; Kelvyn Pk.

Zewel Berman, 3238 Eastwood; civil engineering; Crane Tech.

John O. Carr, Jr., 901 S. Crescent, Park Ridge; electrical
engineering; Fenwick, Oak Park.

Otto E. Curth, 1629 N. Maplewood; mechanical engineering;
Lane Tech.

Rodney G. Dabe, Jr., 3815 Wrightwood; civil engineering;

Lane Tech.

Frank N. Falch, 2041 N. Kimball; electrical engineering;

Lane Tech.

Edward N. Heger, 4446 N. Meade; chemical engineering; Schurz.

Soren W. Henriksen, 2123 N. Tripp; mathematics; Roosevelt.

Robert E. Kuston, 2037 LaCrosse; civil engineering; Lane.

Marshall A. Malina, 3722 N. Central Park; chemistry; Vom

Steuben.

Donald G. Miller, 4421 N. LaCrosse; mechanical engineering;

Schurz.

northwest side honor students, page seven

Roderick A. Nelson, 2845 W. Logan Blvd.; civil engineering;
Wright, Ironwood, Michigan.

William A. Nelson, 3725 N. St. Louis; electrical engineering;
Lane Tech.

Raymond C. Nordhaus, 4330 N. Bernard; mechanical engineering;
Roosevelt.

Edward H. Riedel, 5034 Berteau; mechanical engineering; Schurz.
Lee Schlesinger, 2057 Pierce; civil engineering; Crane Tech.
Clifford D. Seidler, 2534 W. Fullerton; mechanical engineer-
ing; Lane Tech.

William C. Silva, 1857 N. Francisco; mechanical engineering;
Strong Vincent, Erie, Pa.

Milton Steinberg, 1527 S. Kolin; electrical engineering;
Manley.

Peter Q. Waterloo, 5430 Agatite; industrial engineering;
St. Mel.

Harry W. Wessely, 2528 N. Koeler; mechanical engineering;
Kelvyn Park.

William B. West, Jr., 4717 Kenwood; mechanical engineering;
Beaumont, Texas.

Juniors (6th term):

Irvin H. Becker, 5502 W. Lawrence; mechanical engineering;
Lane Tech.

Angelius Duros, 831 Windsor; civil engineering; Lane Tech.

Leroy O. Gieseke, 35 W. Hattendorf, Roselle; mechanical
engineering; Glenbard, Glen Ellyn.

northwest side honor students, page eight

Charles D. Grey, 1424 W. Division; mechanical engineering;
Weber.

Henry S. Grzybacz, 2442 N. Mc Vicker; mechanical engineering;
Lane Tech.

Henry A. Kofitz, 3455 Diversey Ave.; electrical engineering;
Luther Institute.

Ellis M. Landsbaum, 5638 N. St.Louis; chemical engineering;
Von Steuben.

Everett H. Lilja, 3512 N. Rutherford; mechanical engineering;
Schurz.

Maier Margolis, 3741 Eastwood; electrical engineering;
Roosevelt.

William M. Nickel, 2440 N. Avers Ave.; industrial engineering;
Tuley.

Clifford C. Petersen, 3640 Fullerton Ave.; electrical
engineering; Kelvyn Park.

Howard E. Post, 5236 W. George St.; chemical engineering;
De Paul Academy.

Shouky A. Shaheen, 5218 N. Spaulding; business and economics;
Von Stueben.

Julian Snyder, 5000 N. Troy; civil engineering; Lane Tech.

Leonard L. Schneider, 2531 Talman; electrical engineering;
Tuley.

Juniors (5th term):

Anthony F. Borowski, 1032 N. Honore; electrical engineering;
Crane Tech.

Ernest T. Bengtson, 6023 Byron; electrical engineering;
Lane Tech.

northwest side honor students, page nine

Raymond Berman, 3238 W. Eastwood; electrical engineering;
Crane Tech.

James C. Biagi, 2817 N. Rockwell; industrial engineering;
Lane Tech.

Arvid J. Carlsen, 2234 N. Keystone; architecture; Schurz.

George I. Carlson, 4454 N. California; electrical engineering;
Roosevelt.

Robert E. Essig, 4550 N. Lowell Ave.; electrical engineering;
St. Patrick's Academy.

Donald J. Gimpel, 5407 Christiana; electrical engineering;
Von Steuben.

Robert K. La Crosse, 3724 Fullerton; mechanical engineering;
Lane Tech.

Joseph H. Laurinec, 6046 N. Menard; mechanical engineering;
Lane Tech.

Jerome J. Laurinec, 6046 N. Menard; mechanical engineering;
Lane Tech.

Julian Neiditch, 4717 N. Springfield; electrical engineering;
Roosevelt.

William J. Rostal, 3419 N. Cumberland; electrical engineering;
Schurz.

Harry A. Sommerfield, 3215 W. Ainslee; business and
economics; Von Steuben.

Howard B. Van Dagens, 4435 N. Melvina; electrical engineering;
Lane Tech.

William G. Weber, 6010 N. Keating; civil engineering;
Lane Tech.

northwest side honor students, page ten

Sophomores (4th term):

Harold A. Bergen, 3743 W. Windsor; electrical engineering;
Roosevelt.

Raymond W. Casati, 6051 W. Waveland; architecture; Schurz.

Edward E. Chaiken, 1916 W. Division; mathematics; Marshall.

Floyd M. Gardner, 5045 N. Ridgeway, electrical engineering;

Von Steuben.

Robert R. Holmes, 5636 Meade; physics; Taft.

Eugene A. Iwanski, 2322 Walton; mechanical engineering;

Cass Tech, Detroit, Michigan.

Ramon A. Klitzke, 7338 W. Summerdale; fire protection and
safety engineering; Lane Tech.

Lillian J. Kozlowski, 1550 N. Leavitt; home economics; Austin.

Paul E. Larsen, 2939 Newland; electrical engineering; Schurz.

Marvin Mann, 3221 W. Division St.; electrical engineering;

Von Steuben.

Gilbert R. Speich, 359 Hemlock; Wooddale, Ill.;
metallurgical engineering;

Lane Tech.

Heinz C. Recknagel, 3833 N. Ridgeway; mechanical engineering;

Schurz.

Marshall L. Stein, 4605 N. Kimball; electrical engineering;

Roosevelt.

Thomas L. Thourson, 4101 N. Ozanam Ave.; physics; Lane Tech.

Robert A. Vandervest, 5047 W. Altgeld St.; electrical
engineering; Crane Tech.

Sophomores (3rd term):

Richard L. Dargis, 2825 N. Avers; mechanical engineering;

Schurz.

Roman J. Gostkiewicz, 2613 W. Berwyn; physics; Weber.

Edgar J. Karpus, 3446 Evergreen; mechanical engineering; Lane.

Charles I. Koehlert, 614 S. 3rd St., Dundee; mechanical engineering; Dundee Community.

James T. Kouba, 2449 W. Augusta Blvd.; physics; St. Philip.

Clarence J. Maday, 2601 N. New England; mechanical engineering; St. Mel.

James A. Weinman, 3015 Wilson; physics; Roosevelt.

Freshman (2nd term):

James E. Batz, 5637 School St.; electrical engineering; Foreman.

Martin J. Brown, 2320 N. Springfield; physics; St. Philip.

Russel C. Kuhn, 4819 Warner; electrical engineering; Senior, East St. Louis, Ill.

Edwin J. Lawson, 2119 N. Spaulding; architecture; De Paul Academy.

Raymond Nepute, 8727 Belden, River Grove; physics; Leyden Community, Franklin Park, Ill.

Jerome Soltan, 4948 N. Christiana; mechanical engineering; Von Steuben.

Edwin J. Strojny, 1621 W. Division St.; chemical engineering; Pellston, Michigan.

Richard S. Tveter, 4826 N. Central Park; mechanical engineering; Von Steuben.

Freshmen (1st term):

Harry F. Anderson, Jr., 4052 N. Oriole Ave.; civil engineering; Lane Tech.

Peter Bays, Jr., 4250 N. Keller; mechanical engineering; Fournier Institute, Lemont, Ill.

Donald E. Esau, 5105 N. Mulligan; mechanical engineering; Lane Tech.

Walter L. Grabowski, 852 N. Hoyne; mechanical engineering; Tuley.

John W. Nichols, 2307 Carrer St., Gary, Indiana; mechanical engineering; Roosevelt.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street
Chicago 16, Illinois
CALUMET 9600

Public Relations Department
James W. Armsey, Director

Mailed: January 7, 1949
FOR RELEASE: Immediate

CHICAGO -- One hundred and thirty-five west side students at Illinois Institute of Technology have received recognition on the deans' honor list announced today by John T. Rettaliata, dean of engineering, and John Day Larkin, dean of liberal studies.

The list is composed of all students who received a grade average above 2.00 (B). Students with an average between 2.50 and 3.00 (B plus to A) are accorded first honors and those between 2.00 and 2.49 (B to B plus) second honors.

First honor students, with home addresses, major fields of study, and high schools from which they were graduated, are:

Seniors (8th term):

John S. Culver, 30 Woodside Rd., Riverside; mechanical engineering; Yorkton, Sask., Canada.

Roger Spicer Dreffin, R #1, West Chicago; electrical engineering; Oak Park.

-more-

West side honor students, page two

Peter J. Klaphaak, 1805 S. Scoville; Berwyn; chemical engineering; George School, Bucks County, Pa.

Alexander C. Koehler, 3125 $\frac{1}{2}$ Harlem, Berwyn; civil engineering; Morton, Cicero, Ill.

Lucien G. Maury, 1408 Central Ave., Evanston; chemistry; Union, Miss.

Earle A. Phillips, Jr., 5825 Arthington; mechanical engineering; Morton, Cicero, Ill.

Frank Pospisil, 3614 W. 26th St.; mechanical engineering; Crane Tech.

Joseph E. Praser, 1342 Wesley, Berwyn; industrial engineering; Morton, Cicero, Ill.

Ralph E. Scheffers, 1347 Eddy St.; electrical engineering; York Community, Elmhurst, Ill.

Laddie M. Thomka, 901 N. Kedvale; chemical engineering; Austin.

Bert J. Toppel, 645 S. 20th Ave., Maywood; physics; Proviso Township, Maywood, Ill.

Robert H. Waghorne, 5219 Oakdale; chemical engineering; Crane Tech.

William V. Willcox, 309 Myrtle Ave., Elmhurst; business and economics; York Community, Elmhurst.

Seniors (7th term):

Ruth C. Bouril, So. Elgin, Ill; home economics; Elgin.

Jerome S. Birch, 36 Daniels; Elgin; electrical engineering;

Von Steuben.

Leonard Z. Breen, 4208 W. Adams; business and economics;

Crane Tech.

west side honor students, page three

Vincent S. Chobot, 2716 S. Cuyler, Berwyn; electrical engineering; Morton, Cicero, Ill.

Eugene Goldberg, 1543 S. St.Louis; physics; Harrison Tech.
Alexander Goldsmith, 1440 S. Kolin; mechanical engineering;
Hyde Park.

Walter E. Holtz, 4038 Montrose; mechanical engineering; Senn.
Raymond E. Schreiber, 3511 Hollywood, Hollywood, Ill.;
electrical engineering; Riverside-Brookfield, Riverside, Ill.

Juniors (6th term):

Robert J. Allen, 224 Clinton Ave., Oak Park; mechanical engineering; Oak Park.

James A. Finlayson, 1817 S. Springfield; electrical engineering; Crane Tech.

George E. Lusk, 1804 S. 50th Ct., Cicero; electrical engineering; Morton, Cicero, Ill.

Charles W. Siegmund, Jr., 700 S. Clifton, Park Ridge;
chemical engineering; Senn.

Juniors (5th term):

Theodore J. Adams, 570 S. School, Lombard; mechanical engineering; York Community, Elmhurst, Ill.

Edward R. Fencl, 2746 S. Lawndale; mechanical engineering;
Farragut.

Boris Field, 4500 N. Sacramento; electrical engineering;
Roosevelt.

Jerome L. Ficek, 2232 S. 59th Ave., Cicero; English; Morton.

Warren R. Gregory, 3540 53rd Ct., Cicero; electrical engineering; Oak Park.

west side honor students, page four

William P. Manos, 4739 W. Adams; mechanical engineering;
Austin.

Seymour V. Parter, 3615 W. Polk St.; physics; Marshall.

Robert H. Rausch, 3621 S. Gunderson, Berwyn; electrical
engineering; Morton, Cicero, Ill.

Perry L. Toback, 3304 W. Grenshaw; electrical engineering;
Marshall.

Anthony M. Trozzolo, 4410 Lexington; chemistry; Crane Tech.

Sophomores (4th term):

John B. Booth, 9030 Sheridan Ave., Brookfield; electrical
engineering; Riverside-Brookfield, Riverside, Ill.

William P. Drews, 910 S. 6th Ave., Maywood; chemical
engineering; Proviso.

Bernard J. Lamberty, 603 N. Brainard, La Grange; electrical
engineering; Fenwick.

Donald H. Ward, 585 Prairie, Glen Ellyn; electrical engi-
neering; Glenbard.

Sophomores (3rd term):

Robert W. Gromer, 208 S. 17th Ave., Maywood; industrial
engineering; Proviso Township, Maywood, Ill.

Robert F. Karlicek, 1833 Scoville Ave., Berwyn; electrical
engineering; Morton, Cicero, Ill.

Richard T. Prince, 1316 S. Central Park; physics; St. Philip.

Aaron D. Shankman, 809 S. Spaulding Ave.; metallurgical
engineering; Marshall.

Harold V. Watts, 300 S. Main, Wheaton; physics; Wheaton
Community.

West side honor students, page five

Freshmen (2nd term):

Harry J. Hummel, 284 Church St., West Chicago; electrical engineering; Community.

John W. Scannell, 4522 Greenview; electrical engineering; Elgin, Nebraska.

Arnold A. Strassenburg, Armbrust Ave., Wheaton; physics; Community.

Freshmen (1st term):

Robert M. Beckers, 5547 W. Lexington; mechanical engineering; Austin.

William T. Gross, 3341 Warren; mechanical engineering; Marshall.

Joseph D. Lokay, 3748 S. Wenonah, Berwyn; chemical engineering; Morton, Cicero, Ill.

Second honor students are:

Seniors (8th term):

Ruben J. Baer, 5344 S. Maryland; civil engineering; Hyde Park.

Robert R. Bartlett, 930 S. Euclid, Oak Park; industrial engineering; Oak Park.

Warren G. Brockmeier, 305 Forest Ave., Oak Park; fire protection and safety engineering; Oak Park.

Jacques C. Brownson, 972 Sixth St., Aurora; architecture; East Aurora.

Edward Corrigan, 1822 S. Gunderson, Berwyn; civil engineering; St. Patrick.

Samuel R. Curiale, 437 Harrison, Oak Park; mechanical engineering; Oak Park.

west side honor students, page six

Don D. Davison, 525 N. Grant, Hinsdale; electrical engineering; Hinsdale Township.

Martin C. Fanz, 3450 Maple Ave., Brookfield; chemical engineering; Riverside-Brookfield, Riverside, Ill.

Sigmund Matthew Fisher, 3851 Lexington; electrical engineering; Crane Tech.

Harold E. Fortner, 2415 Gunderson Ave., Berwyn; industrial engineering; Morton, Cicero, Ill.

Donald K. Grover, 7507 Cottage Grove; mechanical engineering Riverside-Brookfield, Riverside, Ill.

Charles Haase, 959 N. Lamon; mechanical engineering; Foreman.

Donald W. Hansen, 410 Cottage Hill, Elmhurst; business and economics; Austin.

Patricia Ann Kennedy, 728 S. Ridgeland, Oak Park; English; Oak Park.

Edward F. Kosner, 1616 S. 59th Ct., Cicero; mathematics; Morton, Cicero, Ill.

Lawrence R. Krahe, 137 Harrison, Oak Park; electrical engineering; Oak Park.

William R. Laut, 175 Haven Rd., Elmhurst; mechanical engineering; York Community.

Cecil C. Lencioni, 201 S. Kedzie; electrical engineering; St. Philip.

John C. Lentz, 455 Claim St., Aurora; mechanical engineering; Marmion Military Academy, Aurora, Ill.

Leo A. Polivka, 1403 S. 50th Ave., Cicero; mechanical engineering; Farragut.

Paul A. Roys, 115 West Park, Villa Park; physics; York.

Morton M. Sherman, 3626 West Polk; mechanical engineering;

Crane Tech.

Willard Skolnik, 5305 Maryland; electrical engineering; Hyde

Park.

Roland F. Stancl, 2336 Harvey, Berwyn; chemical engineering;

Morton, ..

James L. Stueber, 366 Weston, Aurora; fire protection and
safety engineering; East Aurora.

Emil J. Tanana, 2854 West 21st street; electrical engineer-
ing; Morton.

Robert R. Taylor; 624 Clinton, Oak Park; mechanical engineer-
ing; Oak Park.

Dorothy Turck, 152 West Schiller; architecture; Milwaukee
University School, Milwaukee.

Richard B. Wittmann, 151 North Laramie; mechanical engineer-
ing; Austin.

Seniors (1st term):

Robert V. Batch, 2647 Harvey Ave., Berwyn; mechanical
engineering; Morton.

Frank Deitch, 1313 South Christiana; chemical engineering;
Crane Tech.

Carl V. Goding, 6928 30th Pl., Berwyn; electrical engineer-
ing; Morton.

Craig W. Graham, 440 Elgin Ave., Forest Park; mechanical
engineering; Oak Park.

Donald E. Miller, 2441 South Grove, Berwyn; chemical
engineering; Morton.

est side honor students-- page eight

Lawrence I. Minov, 1328 South Harding; chemical engineering;
Marshall.

Marshall M. Newcome, 320 South Grove, Oak Park; chemistry;
Oak Park.

John J. O'Brien, Jr., 3033 South Harding; mechanical engineer-
ing; Farragut.

Robert W. Olesen, Oak Brook Rd., Hinsdale; mechanical
engineering; Hinsdale.

Raymond J. Perina, 2619 South Crawford; electrical engineer-
ing; Farragut.

Robert J. Pinske, 3059 Jackson; mechanical engineering;
Crane Tech.

William A. Plice, 134 N. Humphrey, Oak Park; electrical
engineering; Oak Park.

Richard W. Smith, 833 Lebanon St., Aurora; mechanical engin-
ering; East Aurora.

Juniors (6th term):

Dale R. Barrows, 1200 Eddy St.; electrical engineering;
Orange Township, Waterloo, Iowa.

Charles R. Bradlee, 9 N. Hoffman, Naperville; mechanical
engineering; Naperville.

Robert A. Eubanks, 2046 Maypole Ave., mathematics; Crane.

Mark I. Finfer, 3342 Douglas Blvd.; architecture; Marshall.

Walter Masao Fujimoto, 1854 N. Dayton; architecture; Poston
II, Poston, Arizona.

Jack C. Hedge, 26 S. Thurlow St., Hinsdale; mechanical
engineering; Hinsdale Township.

West side honor students, page nine

Howard G. Hughey, 259 Berteau, Elmhurst; mechanical engineering; York Community.

Jerry G. Jelinek, 4146 Elm Ave., Lyons; industrial engineering; Morton, Cicero, Ill.

Jerome J. Kizior, 5402 W. 22nd Pl., Cicero; metallurgical engineering; Holy Trinity.

George F. Kovar, 6411 W. 27th St., Berwyn; electrical engineering; Morton, Cicero, Ill.

Roy J. Overby, 821 Forest Ave., Oak Park; mechanical engineering; Proviso, Maywood, Ill.

Virginia B. Rezabek, 2115 S. Wenonah Ave.;^{Berwyn;} home economics; Morton, Cicero, Ill.

James H. Sheldon, 220 Clinton Ave., Oak Park; mechanical engineering; Oak Park.

Melvin G. Schneider, 3111 W. 15th; mechanical engineering; Harrison Tech.

Louis C. Schultz, 3447 N. Oak Park Ave.; electrical engineering; Steinmetz.

Eugene R. Stanley, 715 Pleasant, Glen Ellyn; electrical engineering; Glenbard, Glen Ellyn, Ill.

Robert F. Toskey, 3040 S. Millard; mechanical engineering; Farragut.

Frank R. Valvoda, 2837 Wenonah, Berwyn; electrical engineering; Morton, Cicero, Ill.

Richard G. Weckerlin, 3818 N. Nottingham; civil engineering; Steinmetz.

est side honor students, page ten

Roland N. Wille, 829 S. Ada; mechanical engineering; Lane.

Juniors (5th term):

Arthur L. Chesterfield, 4103 N. Hermitage; architecture;
Arsenal Tech, Indianapolis, Indiana.

Anthony S. Diomontopoulos, 520 S. Laramie Ave.; mechanical
engineering; Austin.

John T. Dygdon, 2050 W. Cullerton St.; industrial engin-
eering; Harrison Tech.

Walter M. Dygdon, 2050 W. Cullerton St.; industrial engin-
eering; Harrison Tech.

Normal E. Ernstein, 1418 W. Garfield; chemical engineering;
Shaw, Cleveland, Ohio.

Jerome C. Golohaber, 1301 S. Spaulding Ave.; electrical
engineering; Shenandoah, Pa.

Ben T. Honda, 925 Leland; architecture; Biggs Union, Calif.

Julius Huff, 4243 W. Roosevelt Rd.; mechanical engineering;
Crane Tech.

Sidney D. Jeffe, 1254 S. Keeler; mechanical engineering;

Crane Tech.

Irving H. Melnick, 2533 W. Madison; chemistry; Crane Tech.

Charles E. Mok, 4330 Washington Blvd.; mechanical engineer-
ing; Pui Ching Middle School, Canton, China.

William J. Novak, 2329 S. Cuyler Ave., Berwyn; electrical
engineering; Morton, Cicero, Ill.

Charles A. Padgitt, 1812 N. Nordica St.; chemical engineer-
ing; Steinmetz.

Edward Paul, 1331 Loyola; architecture; Wood River Community,
East Alton, Ill.

West side honor students, page eleven

Fred H. Sanneman, 1237 S. 14th Ave., Maywood; mechanical engineering; Proviso.

Frank D. Sulc, 1835 S. 58th Ct., Cicero; chemical engineering; Morton.

Robert S. Taboloff, 857 S. Clinton Ave., Oak Park; civil engineering; Harrison Tech.

Daniel Zusman, 2620 N. Mozart; electrical engineering; Farragut.

Sophomores (4th term):

Meyer Baskovitz, 707 S. Lawndale Ave.; industrial engineering; Crane Tech.

Kenneth F. Biddle, 87 Ohio St., Maywood; electrical engineering; Proviso Township, Maywood, Ill.

George E. Chutka, 2815 S. Cuyler Ave., Berwyn; chemistry; Morton, Cicero, Ill.

Richard G. Clow, 1429 W. Jackson; physics; Sullivan.

Edward H. Fauth, Oswego, Ill.; mechanical engineering; East Aurora, Aurora, Ill.

Glenn F. Grotz, 1714 S. 9th, Maywood; electrical engineering; Proviso Township.

William A. Hamilton, 5960 W. Race; metallurgical engineering; Penwick, Oak Park.

Walter J. Henderson, 28 E. Kenilworth, Villa Park; physics; York Community, Elmhurst, Ill.

Raymond L. Klockzim, 4301 S. Harlem Ave., Berwyn; industrial engineering; Lane Tech.

Donald F. Leal, 1805 S. 17th Ave., Maywood; electrical engineering; Proviso Township.

west side honor students, page twelve

Reginald D. Malone, 719 Barry; business and economics;
Hannibal, Missouri.

David Miller, 1328 S. Kedvale; chemical engineering; Crane.

Ted Randich, 3426 W. Jackson; business and economics;
Proviso, Maywood, Ill.

Donald F. Rietz, 849 N. Lawler; civil engineering; St.
Ignatius.

Philip Smaller, 3622 Lexington; electrical engineering;
Crane Tech.

John W. Sugden, 5633 N. Kenmore; architecture; East, Salt
Lake City, Utah.

Sophomores (3rd term):

Richard E. Daniel, 2415 S. 58th Ave., Cicero; electrical
engineering; Morton.

John A. Fitzmaurice, Jr., 6413 W. Roosevelt Rd., Berwyn;
physics; Morton, Cicero, Ill.

Richard C. Genis, 1611 S. 49th Ct., Cicero; mechanical
engineering; Morton.

Robert M. Ducay, 716 W. 19th Pl.; business and economics;
Harrison Tech.

Edmund C. Golbeck, 523 Madison, Glencoe; electrical engi-
neering; Pullman Tech.

Max L. Grimshaw, 209 Bryant Ave., Glen Ellyn; metallurgical
engineering; Glenbard, Glen Ellyn, Ill.

Gene H. Josephsen, 2007 S. Allport St.; electrical engineer-
ing; Egg Harbor City, New Jersey.

Charles E. Muris, 625 S. Kedvale; civil engineering;
Marshall.

west side honor students, page thirteen

John B. O'Brien, 3151 W. Flournoy; physics; Marshall.

Marvin A. Solzenstein, 167 N. Cicero; mechanical engineering; Farragut.

Donald F. Sauls, 209 S. Cornell, Villa Park; mechanical engineering; York.

Maxine L. Schnierow, 122 N. Long; home economics; Austin.

Frank J. Weingartner, 4301 W. Monroe; electrical engineering; Oak Park.

Freshmen (2nd term):

Tom T. Arai, 817 Milwaukee Ave.; mathematics; Washington, Portland, Oregon.

Henry C. Borre, 1932 N. 73rd Ave.; electrical engineering; Proviso Township, Maywood, Ill.

Julian H. Braun, 5020 W. Quincy; mechanical engineering; Austin.

Roland B. Buttefield, 4833 Grand Ave., Western Springs; electrical engineering; St. Rita.

Douglas A. Drake, 3111 N. Odell Ave.; architecture; Steinmetz

Owen W. Dykema, 48 E. Kenilworth; Villa Park; mechanical engineering; York Community, Elmhurst.

Charles O. Eissler, 4824 W. Augusta Blvd.; physics; Central, Evansville, Indiana.

Morris A. Franks, 121 N. Pine; industrial engineering; Austin.

Robert A. Kopecky, 2432 S. 60th Ct., Cicero; biology; Morton.

Alfred R. Leisnering, 1016 N. Hayes Ave., Oak Park; architecture; Oak Park.

west side honor students, page fourteen

Henry E. Lokay, Jr., 3748 S. Wenona, Berwyn; electrical engineering; Morton, Cicero, Ill.

Ronald P. McClain, 6147 Langley; chemical engineering; Crane Tech.

Daniel C. McGuckin, 4725 W. Congress; business and economics Austin.

William H. Muttera, Jr., 4230 W. Jackson; chemical engineering; Pontiac, Michigan.

Gerald S. Rose, 3919 W. 19th St.; chemical engineering; Crane Tech.

Sidney Schiff, 823 S. Lawndale; chemistry; Marshall.

Alice L. Stoltzner, 617 N. Lombard, Oak Park; home economics Oak Park.

Edwin W. Storer, 721 Belleforte, Oak Park; fire protection and safety engineering; Oak Park Township.

Edward P. Straka, 267 Lawton Rd., Riverside; business and economics; St. Philip.

Richard W. Verdon, 407 S. Lincoln, Hinsdale; civil engineering; Luther Institute.

Joseph Bass, 1618 S. Ridgeway; biology; Marshall.

Freshmen (1st term):

Jack Abrams, 3607 W. Polk; electrical engineering; Marshall.

Samuel Halperin, 3552 Lexington; political science; Austin.

Sanford M. Hanberg, 1808 S. Harding; electrical engineering; Crane Tech.

Robert C. Kapoun, 2531 Euclid, Berwyn; electrical engineering; Morton.

Robert Lance, 755 S. St. Louis Ave.; chemistry; Marshall

Robert Schuchman, 3626 W. Polk; mechanical engineering; Marshall.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street

Chicago 16, Illinois

CALUMET 9600

Mailed: January 7, 1948

FOR RELEASE: Immediate

CHICAGO -- One hundred and twenty north side students at Illinois Institute of Technology have received recognition on the deans' honor list announced today by John T. Rettaliata, dean of engineering, and John Day Larkin, dean of liberal studies.

The list is composed of all students who received a grade average above 2.00 (B). Students with an average between 2.50 and 3.00 (B-plus to A) are accorded first honors and those between 2.00 and 2.49 (B to B-plus) second honors.

First honor students, with home addresses, major fields of study, and high schools from which they were graduated, are:

Seniors (8th term):

Victor W. Adams, 1951 Foster avenue; mechanical engineering;
Hirsch.

Howard H. Fink, 1551 West Schreiber; psychology; Sullivan.

Arthur H. Kuhn, 2622 Grant, Evanston; civil engineering;

St. George, Evanston.

north side honor students -- page two

Robert B. Newman, 2344 Lakeside place, Highland Park;
industrial engineering; Highland Park.

Philip G. Richman, 1452 Fargo; electrical engineering; St.
George, Evanston.

Westly E. Ruther, 6517 Greenview; chemical engineering;
Sullivan.

Wilford M. Wittenberg, 1323 Touhy; electrical engineering;
Von Steuben.

Stephen M. Wynne, 1741 West Wallen avenue; civil engineering;
Quaker school, Ommen, Holland.

Seniors (7th term):

Anders Bjorklund, 6735 North Maplewood; business and
economics; New Trier Township, Winnetka.

John P. Doering, 6118 North Sheridan; mechanical engineering;
Steinmetz.

Jerome Greenstein, 2256 North Cleveland; mechanical
engineering; Crane Tech.

George Knackstedt, 1013 Linden, Wilmette; electrical
engineering; Hyde Park.

Albert J. Schwarz, 6040 Winthrop; mechanical engineering;
Senn.

Juniors (6th term):

Louis L. Czyzewski, 1159 Milwaukee; chemical engineering;
Lane Tech.

Wilbert G. Kantz, 2521 Pensacola; civil engineering;
Amundsen.

north side honor students, page three

James H. Kogen, 1215 Lunt avenue; electrical engineering;
Sullivan.

Juniors (5th term):

Seymour J. Larber, 6357 North Oakley; industrial engineering;
Lakeview.

Howard L. Newman, 537 Belmont; electrical engineering; Lane
Tech.

Arnold I. Salka, 7004 North Paulina; chemical engineering;
Sullivan.

Sophomores (4th term):

Lois Aileen Bey, 1851 Eddy St.; chemical engineering; Lakeview.

Kenneth D. Boenitz, 2634 Glenlake Ave.; electrical engineering;
Rock Island.

William S. McDonald, 5864 Magnolia; physics; Senn.

Sophomores (3rd term):

Richard D. Cederberg, 2817 N. Lakewood; electrical engineer-
ing; Lane Tech.

Thomas J. Walsh, 1745 Arthur Ave.; mechanical engineering;
Lane Tech.

Freshmen (2nd term):

John M. Menke, 2617 Coyle Ave.; chemical engineering; St.
George, Evanston.

Robert S. Miller, 7372 N. Winchester; chemical engineering;
Senn.

Robert H. Sherman, 2523 Farwell; chemistry; Lane Tech.

Arthur N. Tokata, 6 W. Chicago; chemical engineering; Crane

north side honor students, page four

Freshmen. (1st term):

Harry G. Allgauer, 2442 Burling; electrical engineering;
Lane Tech.

Charlotte E. Decker, 5527 Glenwood Ave.; physics; Senn.

Second honor students are:

Seniors (8th term):

Frank A. Allseits, 1322 Wellington; chemical engineering;
St. George, Evanston.

Ralph W. Bock, 2232 Melrose St.; mechanical engineering;
Lane Tech.

Louis L. Fisher, 2700 Argyle; electrical engineering;
Roosevelt.

Spencer Floyd, 1619 Wilson avenue; business and economics;
Lake View.

Donald M. Friedlen, 3750 Lake Shore Drive; mathematics; Senn.

Eric O. Gabler, 841 Dakin St.; industrial engineering; Lane
Tech.

Morris Gitterman, 6519 N. Ashland; chemical engineering;
Von Steuben.

Maurice N. Gross, 4848 N. Rockwell St.; industrial engineer-
ing; De Paul Academy.

Werner Heimann, 6350 N. Magnolia; mechanical engineering;
Realgymnasium, Mainz, Germany.

George W. Hettrick, 2055 W. Touhy; mechanical engineering;
Steinmetz.

Jerome C. Joerger, 729 W. Roscoe; electrical engineering;
De Paul Academy.

north side honor students, page five

Seymour Kessler, 2053 Argyle; mechanical engineering;
Roosevelt.

Peter A. Mininegen, 5940 N. Fairfield; civil engineering;
Loyola Academy.

Raymond M. Preston, 1604 Berwyn; electrical engineering;
Foreman.

Robert M. Ricker, 2415 Eastwood Ave.; electrical engineering;
St. George, Evanston.

Theodore Shapin, Jr., 4006 Sheridan Rd.; electrical engineering;
Lane Tech.

Harry Shapiro, 2128 Cleveland; electrical engineering; Lane.

Allan I. Simon, 848 Grace; mechanical engineering; Lane Tech.

(CST) Thursday January 13, 1949

ADVANCE FOR RELEASE AFTER 11 A.M. (C.S.T.) THURSDAY JANUARY 13, 1949

MEMPHIS, Tenn. -- The ordinary brick joisted building is more susceptible to collapse than any other type of structure, John J. Ahern, director of the department of fire protection and safety engineering at Illinois Institute of Technology, Chicago, said here today.

Speaking before fire department instructors at their twenty-first annual conference in Municipal Auditorium, Professor Ahern stated that the common wood frame building shows a greater resistance, while the steel or reinforced concrete supported structures are most resistant of all.

"Brick joisted buildings in which floor and roof loads are carried almost entirely by the side walls will tumble like a house of cards if the walls are disturbed," he declared.

Buildings once up do not collapse by themselves, Professor Ahern explained. Their destruction is brought about by the things human beings do or fail to do to them.

-more-

"Buildings are constructed under various codes which provide for strength requirements, fire resistance, sanitary facilities and exit facilities. From the earliest times--as far back as 2000 B.C. when a ruler decreed that if a building collapsed the architect of the structure should be put to death--the public has been entitled to expect structures to stay up once they are in place."

Professor Ahern cited the five most common causes of building collapse:

1. Foundation failure, a prolific source of collapse in frame structures built on wood post foundations.

2. Structural deterioration, especially wood that has shrunk or mortar that has been washed out.

3. Overloading, a factor in almost every collapse though usually not the initiating factor.

4. Alterations, in which the building is remodeled without proper caution or asked to serve a use other than that for which it was originally constructed.

5. Fires and explosions.

"As our civilization becomes older, we can expect more collapse cases," Professor Ahern stated, "but fire departments through their inspection work can prevent many of these future disasters."

-fwj-

...and the need for a more holistic approach to aging research. The authors argue that a focus on the individual's life course and the social context is essential for understanding the complexities of aging.

The authors also discuss the importance of interdisciplinary research in gerontology. They suggest that collaboration between different disciplines, such as psychology, sociology, and biology, is necessary to address the multifaceted nature of aging.

In addition, the authors emphasize the role of policy in promoting successful aging. They argue that government policies should be designed to support the needs of older adults and to create an environment that is conducive to their well-being.

The authors conclude by highlighting the need for continued research in gerontology. They suggest that future studies should focus on understanding the mechanisms of aging and the ways in which social and environmental factors influence the aging process.

Overall, the authors provide a comprehensive overview of the current state of gerontology research and offer valuable insights into the challenges and opportunities facing the field. Their work serves as a valuable resource for researchers, practitioners, and policymakers alike.

The authors also discuss the importance of community-based research in gerontology. They argue that involving older adults in the research process is essential for ensuring that the research is relevant and meaningful to their lives.

In addition, the authors emphasize the role of education in promoting successful aging. They argue that providing older adults with opportunities for learning and growth is essential for their well-being and for the health of society as a whole.

The authors conclude by highlighting the need for continued research in gerontology. They suggest that future studies should focus on understanding the mechanisms of aging and the ways in which social and environmental factors influence the aging process.

CHICAGO -- The 10-story apartment building now under construction on the campus of Illinois Institute of Technology will be ready for occupancy next fall, President Henry T. Heald told members of the Junior Association of Commerce today in the Wedgewood room at Marshall Field & Company.

Dr. Heald, speaking on "Technology Center Comes of Age," discussed the 100-acre development program in the area known as Technology Center, the location of Illinois Tech's educational and research buildings, its Armour Research Foundation, and the affiliated Institute of Gas Technology.

"By next summer," he said, "work will have started on a new building at 34th and Dearborn streets to house the Institute of Gas Technology. Ground will be broken next spring between 31st and 32nd streets along the New York Central tracks for a research laboratory for the Association of American Railroads."

He traced the eight-year growth of Illinois Tech's campus from an area of seven acres surrounding the main buildings of Armour Institute--one of the predecessor institutions--to an area now exceeding 80 acres and projected to 100 acres devoted to technological education and research.

"Only a portion of this land is now cleared," he pointed out,"but Illinois Tech has contributed substantially to the slum clearance and general redevelopment program on Chicago's blighted south side."

Since 1943, Illinois Tech has completed two buildings for the research foundation, three classroom and laboratory buildings, and two dormitories. In addition to the apartment building now under construction, work is also progressing on a new heating plant for the Technology Center campus.

All of the new buildings are in the modern functional style of Ludwig Mies van der Rohe, distinguished director of Illinois Tech's department of architecture.

"The building of tomorrow's Technology Center is an integral part of a vast plan to clear and re-develop the entire seven-square-mile area surrounding the Institute. The significance of this for increased business, real estate revenues, and social progress is indeed tremendous," the educator declared.

CHICAGO -- Further increases in airplane speeds depend upon developments which hinge on the human element, Dr. John T. Rettaliata, dean of engineering at Illinois Institute of Technology, said last night.

He spoke on "Jet Propulsion" to members of the newly-formed Chicago section of the Institute of Aeronautical Sciences at their initial election meeting on the Illinois Tech campus.

"Technical progress in designing planes which exceed the speed of sound has been so rapid in the past two years that the problem also now becomes one of concentrating on human problems," he said.

Dr. Rettaliata warned that unless the pilot can survive and remain operative in the plane, further technical advances are impossible.

He outlined four areas in biotechnology in which engineering and medical scientists are cooperating to push aircraft flight further beyond the speed of sound:

1. Excessive heat in the cockpit.

rettaliata, page two

Without cooling, the temperature at 670 miles per hour (the official world's speed record) would approximate 200 degrees Fahrenheit, the jet propulsion expert explained.

"The solution is refrigeration. In an attempt to approach 'living room' conditions of temperature and pressure, scientists have developed a 16-pound unit which blows cold air on the pilot to keep him cool."

The unit contains a small turbine with a rotor one and half inches in diameter and weighing one-half ounce. It turns at 100,000 revolutions a minute.

2. Blacking out (losing consciousness).

To study pilot black-outs, some laboratories have set up intricate centrifuge equipment utilizing the principle of the farm cream separator.

"No difficulty is encountered in the functioning of the mental processes when the speed remains constant, even though it may be as high as 1500 miles per hour. However, rapid acceleration or deceleration (slowing down) may cause blackouts," he said.

The problem is to protect the pilot, such as by inflated clothing, in such a way that he will not blackout from blood leaving the brain in a pull-out from a dive, or from excessive blood being forced into the brain (called a "red-out") on an outside loop.

3. Escape.

Speeds are now so great that pilots can't climb out and slowly descend in a parachute. At high speeds, the tail structure would tear the pilot apart, Rettaliata said.

(In planes with jet engines in the wing, the tails are built high to get them out of the way of passing blasts of hot air.)

rettaliata, page three

"German experiments during the war revealed that bail-outs were disastrous to pilots. At speeds of 500 miles per hour, the corners of their eyes and mouths were torn and their ears were literally ripped off the sides of their heads." the dean said.

To solve the escape problem, designers have built ejector seats in planes and pilots have been equipped with canopies to protect their heads.

"Human beings can withstand 25 times the pull of gravity on their bodies for one-tenth of a second, and that is long enough to get them out of the plane," Dr. Rettaliata related.

4. Crash trouble.

In crashes, pilots may be subjected to forces of 40 to 50 times the pull of gravity. Cockpits are being designed in an attempt to lessen this danger.

Scientific tests of the human body, mainly the bones, are necessary to determine what the pilot can withstand and what kind of equipment must be designed to protect him.

"Human bones can withstand a compressive stress of 23,000 pounds per square inch. That means they're one-fourth as strong as cast iron and twice as strong as hickory wood. It means people are tougher than we ordinarily think.

-more-

rettaliata, page four

"Technical limitations on the speed of aircraft have not been reached. Future planes may well travel several thousand miles an hour, but the pilot must be able to withstand the physical stress which such speeds will bring.

"The bottleneck in high speed flight may be the human being unless science finds ways to protect him from the forces created by the higher speeds."

CHICAGO -- Illinois Tech's wrestling team will be seeking its second victory of the season over the Navy Pier branch of the University of Illinois Friday evening (January 14).

The match is scheduled to follow a 7:30 basketball contest between the schools in the Navy Pier gymnasium.

The Techawks turned back Navy Pier, 34 to 32, at Illinois Tech on December 4.

Leading Illinois Tech will be Capt. Paul Schermeister, who is undefeated in three heavyweight matches this season. Other unbeaten Techawks are Leonard Berry at 128 pounds and Dean Levi, 145-pounder.

FOR RELEASE: Immediate

CHICAGO -- Capt. Jim McNerney leads Illinois Tech against a strong DePaul university swimming team in the Valentine Boys Club pool, 3400 South Emerald, at 7:30 p.m. Friday (January 14).

McNerney continued his string of victories in both the 60-yard and 100-yard free style sprints last Friday to help the Techawks to a handy 52 to 23 conquest of Loyola. He has not been beaten this year in either race.

The Loyola victory gave Illinois Tech a season's record of two wins and two losses.

The Techawks have one more meet -- against Chicago Teachers next Monday -- before closing shop for semester exams.

from Fritz Jauch

Calumet 5-9600, Ext 546

1. Introduction

The purpose of this study is to investigate the effects of various factors on the performance of a system. The study is divided into two main parts: a theoretical analysis and an experimental investigation. The theoretical part focuses on the development of a model that describes the relationship between the input variables and the output performance. The experimental part involves the design and execution of a series of tests to validate the model and to determine the range of conditions over which it is applicable.

The theoretical analysis is based on the assumption that the system can be represented by a set of linear equations. This assumption is justified by the fact that the system is linear and time-invariant. The equations are derived from the physical principles governing the system and are used to predict the system's response to a given set of inputs. The experimental investigation is designed to test the accuracy of the theoretical model. It involves the measurement of the system's output for a range of input values and the comparison of these measurements with the predictions of the model.

The results of the experimental investigation show that the theoretical model is able to predict the system's performance with a high degree of accuracy. The model is able to account for the effects of the various input variables and to provide a good fit to the experimental data. The range of conditions over which the model is applicable is determined by the range of input values used in the experiments. The model is found to be applicable for a wide range of input values and to provide a good fit to the experimental data over this range.

The conclusions of this study are that the theoretical model is a useful tool for predicting the performance of a system. The model is able to account for the effects of the various input variables and to provide a good fit to the experimental data. The range of conditions over which the model is applicable is determined by the range of input values used in the experiments. The model is found to be applicable for a wide range of input values and to provide a good fit to the experimental data over this range.

FOR RELEASE:

CHICAGO -- Illinois Tech will be favored to capture its sixth basketball victory of the season Friday night (January 14) when Ed Glancy sends his Techawks against the Navy Pier branch of the University of Illinois on the Navy Pier court.

The contest is scheduled for 7:30 p.m. and will be followed by a wrestling match between the two schools.

A win at Navy Pier would give Illinois Tech one more victory than it was able to score last season. The 1947-48 quintet, the first under Glancy, finished with five victories and 13 losses. The present squad has won five and lost four, and two of those defeats were administered by DePaul and Loyola.

Navy Pier has taken three of its nine games thus far this season.

Glancy will open with Capt. Carl Bergstrom and either Carl Matson or Bob Leiser at forwards, George Scalamera at center, and Bob McCue and Leo Kiley at guards.

FOR RELEASE:

CHICAGO -- Fifty persons from outside Chicago and vicinity are among the 779 students at Illinois Institute of Technology who have received recognition on the deans' honor list announced today by John T. Rettaliata, dean of engineering, and John Day Larkin, dean of liberal studies.

The list is composed of all students who received a grade average above 2.00 (B). Students with an average between 2.50 and 3.00 (B plus to A) are accorded first honors and those between 2.00 and 2.49 (B to B plus) second honors.

First honor students, with home addresses, major fields of study, and high schools from which they were graduated, are:

Seniors (8th term):

Rudolph M. Hempel, 302 Maxwell St., Lake Geneva, Wis.; mechanical engineering; Lane Tech.

Robert F. O'Keefe, 2414 Hayden St., Amarillo, Texas; fire protection and safety engineering; Amarillo.

out-of-town honor students, page two

Seniors (7th term):

Joseph H. Dannenmaier, Culver, Indiana; mechanical engineering; Culver Military Academy.

Simon P. Postma, 8125 State Line, Hammond, Indiana; mechanical engineering; Thornton Fractional, Calumet City, Ill.

Juniors (5th term):

Kenneth E. Wolters, 940 S. 57th St., West Allis, Wisconsin; electrical engineering; Central, Milwaukee, Wis.

Sophomores (4th term):

Peter E. Grafton, 208 Vassar St., Reno, Nevada; civil engineering; Reno Senior.

Harold L. Rechter, 2026 N. 50th Ave., Omaha, Nebraska; chemical engineering; Central.

Freshmen (2nd term):

Edward V. Mochel, Culver, Indiana; chemical engineering; Community, Downers Grove, Ill.

John A. Wendland, Elkhart, Indiana; mathematics; Elkhart Senior.

Freshmen (1st term):

Melvin C. Hendrickson, Spring Green, Wisconsin; physics; Spring Green.

Second honor students are:

Seniors (8th term):

Earl W. Fassett, Duncan, Oklahoma; mechanical engineering; Paschal, Fort Worth, Texas.

Yaye Furutani, 121 S. First Ave., El Paso, Texas; biology; Oxnard Union, Calif.

out-of-town honor students, page three

Carter H. Manny, 200 Lake Ave., Michigan City, Indiana;
architecture; Isaac C. Elston.

Allen E. Morris, 887 Stadelmon Ave., Akron, Ohio; electrical
engineering; Buchtel.

Robert A. Pew, 813 19th St., Niagara Falls, N.Y.; business
and economics; Senior.

William J. Sponseller, 2415 9th St., N.W., Canton, Ohio;
civil engineering; Lincoln.

Seniors (7th term):

Edward J. Adolphson, 1021 12th St., Rockford, Ill.; electri-
cal engineering; East Senior.

Frederick J. Diekman, 202 E. 142nd Pl., Dolton, Ill.;
business and economics; Thornton Township.

Roland E. Fisher, Morrison, Virginia; civil engineering.

Roger H. Stohlquist, 2020 S. 5th St., Rockford, Ill.;
mechanical engineering; East Senior.

Juniors (6th term):

Samuel C. Caldwell, 901 E. Linwood Blvd., Kansas City, Mo.;
electrical engineering; Paseo.

John F. Carbery, 2006 15th Ave., Rockford, Ill.; mechanical
engineering; East.

Morris W. Carlson, South Side Gardens, Pecatonica, Ill.;
electrical engineering.

Joseph C. Hamilton, 433 N. 24th St., Battle Creek, Michigan;
mechanical engineering; Central.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and financial management. The text notes that without reliable records, it is difficult to track the flow of funds and ensure that resources are being used effectively and efficiently.

2. The second part of the document addresses the challenges associated with data collection and analysis. It highlights that gathering accurate and timely data can be a complex task, often requiring significant resources and expertise. The text suggests that organizations should invest in robust data management systems and training to overcome these challenges. Additionally, it stresses the importance of ensuring the privacy and security of the data collected, as this is crucial for maintaining trust and compliance with relevant regulations.

3. The third part of the document focuses on the role of technology in improving operational efficiency. It discusses how digital tools and automation can streamline processes, reduce errors, and enhance communication. The text provides examples of various software solutions and platforms that can be used to manage tasks, track progress, and collaborate with team members. It also mentions the importance of staying up-to-date with the latest technological advancements to remain competitive in a rapidly changing environment.

4. The fourth part of the document discusses the importance of continuous learning and professional development. It notes that in a dynamic and ever-evolving industry, it is essential for individuals to stay current in their knowledge and skills. The text suggests that organizations should provide opportunities for training, workshops, and conferences. It also encourages individuals to take initiative in their own learning and to share their knowledge with colleagues.

5. The fifth part of the document concludes by summarizing the key points discussed and reiterating the importance of a proactive and collaborative approach. It emphasizes that success is achieved through a combination of effective planning, diligent execution, and a commitment to excellence. The text ends with a call to action, encouraging all stakeholders to work together to achieve the organization's goals and vision.

CHICAGO -- Illinois Institute of Technology will offer a graduate course in food packaging materials and methods beginning February 16 and continuing through June 8, 1949, it was announced today by Milton E. Parker, professor in charge of the food engineering and technology program.

Consisting of 16 two-hour lectures, the course has been organized by and will be under the direction of Lee Hickox, vice president of Container Laboratories, Inc., Chicago, and a member of Illinois Tech's food technology council.

"The course has been especially designed to acquaint the student with the various components of the packaging industries and the basic types of packaging, their materials, construction, styles, and terminology," Parker said.

"Particular emphasis will be placed upon functional and physical characteristics. Advantages, disadvantages, and limitations of various types of packaging methods and materials will be included." Graduate students in food technology (or equivalent) and any qualified persons in the food processing industries are eligible to enroll in the course. It may be taken with or without academic credit. Those seeking credit will be required to take a final examination. Lectures will begin at 6 p.m.

January 10, 1958
 Mr. [Name] [Address]

Dear Sir: - I have received your letter of January 10, 1958, regarding the course in Food Packaging Technology. This course is a two-semester course, normally completed by students in the School of Business Administration and Economics, Lincoln Institute of Technology.

The course consists of 16 two-hour lectures, one hour of laboratory, and one hour of independent study. The course is designed to provide the student with a thorough understanding of the principles and practices of food packaging technology.

The course has been approved by the American Dietetic Association and the National Institute of Food Technologists. The course is also approved by the American Society for Quality Control and the American Society for Packaging and Semipackaging.

Particular emphasis will be placed upon the physical, chemical, and biological aspects of food packaging, and the relationship of packaging to the various components of the food. The course will also cover the basic types of packaging, such as flexible, rigid, and aseptic packaging, and the terminology used in the field.

Graduate students in food technology, (M.S. level) and any qualified persons in the food processing industries are eligible to enroll in the course. It may be taken with or without academic credit. Those seeking credit will be required to take a final examination. Lectures will begin at 8 p.m.

CHICAGO -- The structure of the radio, motion picture, television, and publications industries -- and their social, economic, and technological aspects -- will be studied by students at Illinois Institute of Technology next semester.

The new course is to be offered by the department of political and social science with the term beginning February 14, Professor Herbert A. Simon, chairman of the department, announced today.

Designed principally to acquaint future engineers with the objectives, methods, and possible developments in the various fields of mass communications, the course will be open to students in all curricula at Illinois Tech.

The functions of mass communications in contemporary society and the means employed by social scientists to study their effects on the people of the nation will be analyzed. The course also includes a study of polls, surveys, and market research used by the industries themselves.

mass communications course, illinois tech, page two

Technological developments and their relationship to the social and economic aspects of mass communications will be noted.

Field trips to newspapers, book publishing houses, and radio and television stations are planned as part of the study.

The course will be taught by Albert D. Biderman, instructor in sociology at Illinois Tech. A specialist in mass communications research, he served during World War II with the Psychological Warfare Division at General Eisenhower's European headquarters.

Mr. Biderman is a 1940 graduate of East Side high school, Patterson, N.J. He received a bachelor's degree in economics at New York university in 1945 and is now working toward a doctorate in sociology at the University of Chicago.

\$35. Applications for registration should be sent to the Dean of the Graduate School, Illinois Institute of Technology, Technology Center, Chicago 16.

Lecture subjects, speakers, and dates follow:

February 16 -- "Introduction to Food Packaging," by Lee Hickox, vice president, Container Laboratories, Inc., Chicago, and "Composite Fiber Cans," by C. Berger Graves, Sefton Fibre Can Company, St. Louis.

February 23 -- "All Metal Rigid Cans for Food -- Products Sterilized by Heat," by Kenneth W. Brighton, Research Department, American Can Co., Maywood, Ill.

March 2 -- "All Metal Rigid Cans for Food -- Products Not Sterilized by Heat," by Roger V. Wilson, director of Customers Research Division, Continental Can Co., Chicago.

March 9 -- "Glass Packages and Their Closures," by Dr. J. H. Toulouse, chief engineer, Quality and Specification Section, Owens Illinois Co., Toledo.

March 16 -- "Packaging Food Products by Vacuumizing the Package," by Roger V. Wilson, director of Customers Research Division, Continental Can Co., Chicago, and "By Heat Sterilization in the Package," by John M. Jackson, Research Dept., American Can Co., Maywood, Ill.

March 23 -- "Paperboard and Its Uses in Food Packaging -- In the Form of Flat Sheets" and "In the Form of Folding Cartons," by a representative of the Marathon Corp., Menasha, Wis.; "In the Form of Set Up Boxes," by William A. Robertson, W. C. Ritchie and Co., Chicago; and "In the Form of Paperboard Milk Containers," by George L. Huffman, PurePak Division, ExCello Corp., Detroit.

March 30 -- "Flexible Barriers -- In the Form of Plastic Sheeting Materials," by William H. Aiken, assistant manager, Chemical Division, Goodyear Tire and Rubber Co., Akron, and "In the Form of Metal Foils," by T. M. Hill, research department, Aluminum Corporation of America, Pittsburgh.

April 6 -- "Flexible Barriers -- In the Form of Paper" and "In the Form of Glassine," by F. S. Leinbach, director of research, Reigel Paper Corp., New York City; "In the Form of Parchment," by G. F. DesAutels, Kalamazoo Vegetable Parchment Corp., Kalamazoo; and "In the Form of Laminations," by K. E. Prindle, vice president, The Dobeckman Co., Chicago.

food packaging course -- page three

April 13 -- "Bags -- In the Form of Paper," "In the Form of Textiles," and "In the Form of Laminations," by Arthur H. Grace, vice president, Bemis Brothers Bag Co., St. Louis and "In the Form of Plastics," by Fred Rodenberger, Traver Corp., Chicago.

April 20 -- "Shipping Containers -- In the Form of Corrugated and Solid Fibre," by B. K. Kells, Container Corporation of America, Chicago; "In the Form of Nailed Wooden Boxes," (instructor to be announced); and "In the Form of Barrels," by F. P. Hankerson, executive secretary, Associated Cooperaage Industries of America, Inc., Washington, D. C.

April 27 -- "Major Food Packaging Components -- Used as Coatings" and "Used as Laminants," by C. E. Fawkes, Fryoxlyn Products Co., Chicago; "Used as Adhesives," by Samuel Schuller, technical director, Paisley Products Inc., Chicago; and "Used as Labels," by C. R. Cosby, secretary, Label Manufacturers National Association, Washington, D. C.

May 4 -- "Food Packaging and Its Relationship to Packaging Machinery," by Kirke H. Becker, president, Peters Manufacturing Corp., Chicago; "To Plant Layout," (instructor to be announced); and "To Plant Sanitation," by Professor M. E. Parker, Illinois Institute of Technology, Chicago.

May 11 -- "Testing Food Packages -- For Physical Performance," by C. J. Zusi, vice president, Container Laboratories, Inc., Chicago and "For Functional Performance," by R. DeS. Couch, General Foods Corp., New York City.

May 18 -- "Frozen Food Packaging," by R. E. Lowey, Dewey & Almy Chemical Co., Cambridge, Mass.

May 25 -- "Packaging Cereal Products," by C. E. Felt, General Mills Corp., Minneapolis.

food packaging course -- page four

June 1 -- "Merchandising and Functional Aspects of Packaging," by Lee Hickox, vice president, Container Laboratories, Inc., Chicago, and "Organization and Operation of the Package Department," by C. K. Wiesman, director of development, Armour & Co., Chicago.

June 8 -- Final examination.

CHICAGO -- Major Lenox R. Lohr, president of the Museum of Science and Industry and president of the Chicago Railroad Fair, will deliver the commencement address at mid-year graduation exercises of Illinois Institute of Technology at 2 p.m. Saturday, January 29, in Orchestra Hall.

Major Lohr will be awarded an honorary degree of doctor of engineering by Dr. Henry T. Heald, president of Illinois Tech.

For many years, Major Lohr has been a leading engineer, author, teacher, and executive. Born in 1891 and graduated with honors from Cornell University in 1916, he devoted the next 13 years to military service.

Before arriving in France in 1918, he was graduated from the Army's coast artillery school and school of codes and ciphers. Overseas, he attended the general staff college at Langres, France, and Clare College of Cambridge University in England.

-more-

lohr degree, page two

In France he rose to major of engineers, fought in the Meuse-Argonne, and received the Silver Star medal for gallantry in action. From 1922 to 1929, he was executive secretary of the Society of American Military Engineers, and editor of its journal, the Military Engineer, whose distinguished service medal he was awarded.

He was general manager of the Century of Progress exposition in Chicago from 1929 to 1935 and vice president and member of the board of trustees from 1933 to 1935. In 1936 he became president of the National Broadcasting Company.

Since July 1940, he has been president of the Museum of Science and Industry in Chicago. Last year he was named president of the Chicago Railroad Fair, which will open again next summer.

He is author of Magazine Publishing (1932) and Television Broadcasting (1940), regular contributor to magazines, editor and publisher of technical books, and member of a number of professional and social societies and clubs.

Major and Mrs. Lohr live at 1401 Ridge Avenue, Evanston. They are the parents of five children.

commencement, southwest side, page four

Awarded the degree of bachelor of science in biology was:

Ernestine Y. Northcross, 5427 Calumet Ave.

Awarded the degree of bachelor of science in business and economics were:

Henry C. Kaecker, 5440 S. Loomis; Lawrence J. Kjellberg, Jr., 8451 S. Green; John E. Scherba, 8111 S. California; James W. Shine, 9213 S. Laflin St.; James S. Somerville, 467 W. Winneconna Parkway.

Awarded the degree of bachelor of science in home economics:

Biruta Shileika, 3214 S. Union; Florence M. Dumke, 923 W. 85th St.; Gloria M. Cibulskis, 2516 W. 69th St.

Awarded the degree of bachelor of science in political and social science was:

Henry W. McGee, 38 W. Garfield Blvd.

Awarded the degree of bachelor of science in physics was:

Eugene Goldberg, 1543 S. St. Louis.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street
Chicago 16, Illinois
CALUMET 9600Mailed: January 21, 1949
FOR RELEASE: Immediate

CHICAGO -- Eighty-one south side students at Illinois Institute of Technology were awarded their bachelor's or advanced degrees at 2 p.m. Saturday January 29 at Orchestra Hall, 220 South Michigan avenue.

Henry T. Heald, president of Illinois Tech, conferred degrees to candidates presented by John T. Rettaliata, dean of engineering, John D. Larkin, dean of liberal studies, and William A. Lewis, dean of the graduate school.

After delivering the commencement address, ^{Mayor} ~~D.~~ Lenox Riley Lohr, president of the Museum of Science and Industry, was made an honorary doctor of engineering by the Institute.

Three hundred and thirty-two students were candidates for undergraduate degrees, with an additional 40 qualifying for master's or doctor's degrees.

Awarded the degree of master of electrical engineering were:

Paul D. Agarwal, 1414 E. 59th St.; Harold L. Garbarino, 5761 Blackstone; Henry A. Hart, 1163 E. 52nd St.; William Kneen, 7519 S. Coles; Morton Nadler, 5519 Kenwood; Meyer Pollack, 5403 University;†

commencement, page two

Basava S. Ramakrishna, 1414 E. 59th St.; Syed Ziauddin, 1414 E. 59th.

Awarded the degree of master of science in chemical

engineering were:

Jacob Chacko, 4405 S. Berkeley Ave.; B.S. Garud, 4405 S.

Berkeley Ave.; Aaron Shaffer, 5510 S. Cornell.

Awarded the degree of master of science in civil engineer-

ing was:

William T. Savage, 6709 S. Cregier Ave.

Awarded the degree of master of science in mechanics were:

Maurice L. Anthony, 5624 Maryland Ave.; Pong-Cheng Chu,

1414 E. 59th St.

Awarded the degree of master of science in mathematics were:

Howard L. Arnould, 5321 Kimbark Ave.; Barbara Reese Vogel,

4603 Lake Park Ave.

Awarded the degree of master of science was:

Youssef M. Atalla, 4426 Greenwood Ave.

Awarded the degree of bachelor of science in mechanical

engineering were:

Arthur B. Alterman, 1335 E. Madison Park; Walter H. Beland,

1502 E. 75th Place; Robert A. Bell, 9821 Ave. H; William E. Buettner,

7215 Prairie; Robert E. Carpenter, 7024 Dante Ave.; John Dvorscek,

11632 Eggleston Ave.; Alfred G. Erickson, 7550 Ridgeland Ave.;

Malcolm S. Greenlaw, 2537 E. 73rd St.; Donald K. Grover, 4917 Drexel

Blvd.; Byron M. Hoskins, 2860 E. 76th St.; Albert D. Krutak, 10122

Calhoun; Harris H. Levee, 5111 S. University Ave.; Simon P. Postma,

8125 State Line, Hammond, Indiana.

-more-

Frederick R. Martin, 8019 St. Lawrence Ave.; William A. Ostarello, 20 E. 116th St.; Johan Ringstad, 1414 E. 59th St.; Irvin M. Schwartz, 7133 East End Ave.; Alexander Sinila, 7964 Kingston Ave.; Edwin G. Voogt, 10401 Wallace St.; Nels G. Wiberg, 9340 Vernon Ave.

Awarded the degree of bachelor of science in electrical engineering were:

Stanley W. Anderson, 1043 E. Marquette Rd.; Russell G. Bath, 8126 S. Blackstone; Edward W. Belsky, Jr., 4743 Drexel Blvd.; Elmer A. Carlson, 5742 Maryland Ave.; Joseph Chernof, 8112 Jeffery; John F. Clancy, 1630 E. 70th St.; Roger J. Connor, 1421 E. 60th St.; Willard C. Darfler, 12802 Greenwood, Blue Island; Norman L. Isaacson, 5135 S. Blackstone; James D. Jones, 7808 South Shore Drive.

James G. Kennedy, 8100 Champlain Ave.; William E. Kreciejewski, 8939 Muskegon Ave.; Werner E. Neuman, 1463 E. 56th St.; Suresh N. Patel, 1414 E. 59th St.; Richard A. Perry, 5134 Woodlawn; Vroman W. Riley, 6909 Chappel Ave.; John F. Russell, 7825 Cregier Ave.; Lawrence J. Stratton, 2211 E. 69th St.; William M. Thompson, 6618 University; Benjamin R. Toczyl, 611 E. 88th Place; Hillert Vitt, 4471 Lake Park.

Awarded the degree of bachelor of science in industrial engineering were:

Charles H. Berman, 10629 Calumet Ave.; Martin L. Black, 8136 S. Drexel Blvd.; Roy A. Sundberg, 823 E. 49th St.

Awarded the degree of bachelor of science in civil engineering were:

Seymour A. Bortz, 7825 Phillips; Harold Kimball, 7145 S. Champlain Ave.; Francisco B. Lorenzo, 5441 Kimbark St.; Avshalom Magidovitch, 6401 S. Ingleside; Leland T. Watson, 5134 S. Woodlawn; Kurtis T. Webb, 1459 E. 53rd St.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street

Chicago 16, Illinois

CALUMET 9600

James W. Armesy, Director

Mailed: January 21, 1949

FOR RELEASE Immediate

CHICAGO-- Sixty-six northwest side students at Illinois Institute of Technology were awarded their bachelor's or advanced degrees at 2 p.m. Saturday January 29 at Orchestra Hall, 220 South Michigan avenue.

Henry T. Heald, president of Illinois Tech, conferred degrees to candidates presented by John T. Rettaliata, dean of engineering, John D. Larkin, dean of liberal studies, and William A. Lewis, dean of the graduate school.

After delivering the commencement address, Major Lenox Lohr, president of the Museum of Science and Industry, received an honorary doctor of engineering degree from the Institute.

Three hundred and thirty-two students were candidates for undergraduate degrees, with an additional 40 qualifying for master's or doctor's degrees.

Awarded the degree of master of science in mechanics were: John A. Briggs, 4036 Potomac avenue; Kenneth Mortimer, 6515 Oshkosh avenue;

Awarded the degree of master of science in physics was: James J. Brophy, 1904 Nordica avenue.

-more-

Awarded the degree of master of science in electrical engineering were: Dabney R. Corum, 7707 North Keeler avenue, Skokie; Albert A. Gerlach, 4020 Overhill avenue.

Awarded the degree of master of science in mechanical engineering was: Hubert J. Thomiszer, 4020 West Palmer street.

Awarded the degree of bachelor of science in chemical engineering were: Louis Baker, 4446 West Deming place; John C. Hayes, 5646 Ridge avenue; Edward N. Heger, 4446 North Meade avenue; Raymond R. Pfohl, 1929 North Karlov avenue; Howard E. Post, 5236 West George street.

Awarded the degree of bachelor of science in electrical engineering were: Edward A. Basista, 2038 West Superior street; John O. Carr, 901 South Crescent, Park Ridge; Anthony A. Ciotola, 3336 West Carroll avenue; Kenneth R. Decho, 5755 West Melrose street; George D. Doland, 4307 Roscoe; Frank N. Falch, 2041 North Kimball.

1117 N. Hamlin
Nathan Golstein, 3455 Evergreen avenue; Matthew R. Heeney/
George E. Hinze, Jr., 2355 Potomac avenue; Arthur J. Koda, 6460 North Nordica avenue; William C. Laube, Jr., 6670 Raven street; Chester R. Lyngaas, 4321 $\frac{1}{2}$ North Tripp avenue; Horbert L. Miller, 3238 Bryn Mawr avenue.

William A. Nelson, 3725 North St. Louis avenue; Ward V. Olney, 4905 North Hamlin; Stanley A. Porke, 4821 North Keeler; Raymond J. Perina, 2619 South Crawford avenue; Henry J. Rabman, 5640 Windsor avenue; David Reid, 4655 North Major avenue; Harry L. Velkovitz, 1110 North Christiana; Arthur Yeslin, 2739 Augusta boulevard.

Awarded the degree of bachelor of science in mechanical engineering were: Ralph E. Belke, 1343 North Monitor avenue; Robert M. Guthrie, Park Ridge;

Walter E. Holtz, 4038 Montrose avenue; Kenneth C. Johnson, 2313 North Natchez avenue; Richard W. Keefe, 1912 North Karlov avenue; Thaddeus C. Kukowinski, 5246 Roscoe street; Lawrence G. Lange, 2144 North Keeler avenue; Raymond C. Nordhaus, 4330 North Bernard street; Napoleon Perkowski, 2351 North Milwaukee avenue; Richard C. Rees, 3231 North Hamlin avenue.

Edward H. Riedel, 5054 Berteau avenue; Clifford D. Seidler, 2534 West Fullerton; Arthur J. Selicman, 3018 Wilson avenue; William C. Silva, 1857 North Francisco avenue; James Sutherland, 6289 North Leona; Harvey L. Theilgaard, 1351 North Lockwood avenue.

Awarded a bachelor of science degree in civil engineering were: Zewel Berman, 3238 Eastwood; Rodney C. Dabe, Jr., 3815 Wrightwood avenue; Robert E. Kuston, 2037 North LaCrosse; Jack Madseu, 2516 North Normandy avenue; Roderick A. Nelson, 2845 West Logan boulevard; Lee Schlesinger, 2057 West Pierce avenue.

Awarded a bachelor of science degree in industrial engineering were: Edward C. Bernhardt, 3643 North Overhill avenue; Robert H. Frahm, 3653 West Cortland; Marvin Glasser, 2029 North Nordica; Joseph E. Panza, 3309 North Kedzie avenue; Harold O. Skinner, 3518 North Long; Charles N. Widstrand, 5708 Henderson street.

Awarded a bachelor of science degree in fire protection and safety engineering were: Raymond H. Bohl, 1211 North Wood street; Samuel Fina, 3708 North Fremont;

Awarded a bachelor of science degree in math was: Soren W. Henriksen; 2123 North Tripp avenue.

Awarded a bachelor of science degree in business and economics was: Bud R. Albanese, 4815 Belle Plaine avenue.

Awarded a bachelor of science degree in chemistry: Bernard
L. Lurie, 5138 North Avers; Marshall Malina, 3722 North Central
park .

Awarded a bachelor of science degree in physics was: Donald
A. Pontarelli, 1338 North Lockwood avenue.

CALUMET 9600

Mailed: January 21, 1949
FOR RELEASE: Immediate

CHICAGO-- Fifty-four west side students at Illinois Institute of Technology were awarded their bachelor's or advanced degrees at 2 p.m. Saturday January 29 at Orchestra Hall, 220 South Michigan avenue.

Henry T. Heald, president of Illinois Tech, conferred degrees to candidates presented by John T. Rettaliata, dean of engineering, John D. Larkin, dean of liberal studies, and William A. Lewis, dean of the graduate school.

After delivering the commencement address, ^{Major}~~Dr.~~ Lenox Riley Lohr, president of the Museum of Science and Industry, was made an honorary doctor of engineering by the Institute.

Three hundred and thirty-two students were candidates for undergraduate degrees, with an additional 40 qualifying for master's or doctor's degrees.

Awarded the degree of doctor of ^{science in} chemical engineering was: Walter Fagan, 3859 Jackson boulevard.

Awarded the degree of master of ^{science in} civil engineering was: Marvin L. Maas, 462 Washington boulevard, Oak Park.

Awarded the degree of master of science in microbiology was: Gertrude C. Burke, 225 North Kostner avenue.

Awarded the degree of master of science in physics was: Robert F. Dvorak, Hinsdale.

Awarded the degree of bachelor of science in chemistry were: Richard K. Flaskamp, 1906 Harvey, Berwyn; Marshall M. Newcome, 320 South Grove avenue, Oak Park.

Awarded the degree of bachelor of science in chemical engineering were: Frank Deitch, 1313 South Christiana; Lawrence I. Minov, 1328 South Harding avenue; David Schwarz, 3710 West 18th street; Morton Sherman, 168 North Laramie avenue; Lawrence M. Simon, 4241 Jackson boulevard; Robert I. Unger, 1832 South Ridgeway avenue.

Awarded the degree of bachelor of science in electrical engineering were: Fred L. Bezold, 131 South 20th avenue, Maywood; Jerome S. Birch, 36 Daniels street, Elgin; Irving Budish, 1620 South Harding avenue; Vincent S. Chobot, 2716 South Cuyler avenue, Berwyn; Carl V. Goding, 6928 30th place, Berwyn; Kenneth V. Knudsen, 6431 West 27th street, Berwyn; Arnold O. Kostka, 3220 Sunnyside, Brookfield; Paul E. Scheameister, 2016 South 7th avenue, Maywood; Irving Sherlock, 5737 North Kenmore avenue; Milton Steinberg, 1527 South Kolin avenue.

Awarded the degree of bachelor of science in civil engineering were: Donald E. Miller, 2441 South Grove avenue, Berwyn; Roy S. Schimmelpfenig, 2123 South Gunderson avenue, Berwyn.

Awarded the degree of bachelor of science in industrial engineering were: Norman F. Novak, 2113 South Springfield; Roger E. Siegel, 320 North Lotus; Frank P. Tumenas, 1224 South 50th court, Cicero; Warren H. Weiss, 223 North LaPorte.

Awarded the degree of bachelor of science in mechanical engineering were: Robert J. Allen, 224 Clinton avenue, Oak Park; Robert V. Batch, 2647 Harvey avenue, Berwyn; Bertil A. Engstrom, 1000 South Elmwood; Marvin Glassenberg, 300 South Hamlin; Alexander Goldsmith, 1440 South Kolin avenue; Craig W. Graham, 440 Elgin avenue, Forest Park; Frank S. Havel, 2315 South 59th court, Cicero.

Kenneth M. Hepler, 402 North Taylor avenue, Oak Park; Edward R. Melka, 1901 South Wisconsin avenue, Berwyn; Robert W. Olesen, Knollwood, Oak Brook road, Hinsdale; Robert C. Osborne, 322 Washington boulevard, Oak Park; Robert J. Pinske, 3059 West Jackson boulevard; Glen A. Seegers, 1226 Circle avenue, Forest Park; Richard Wesley Smith, 333 Lebanon street, Aurora; Roland N. Wille, 829 South Ada street; Anthony E. Zakaras, 1621 South 49th court, Cicero.

Awarded the degree of bachelor of science in business and economics were: Ruth C. Bouril, South Elgin; Leonard Breen, 4208 West Adams; Richard N. Nowell, 213 North Kildare; Theodore H. Schrage, 2524 West Adams.

Awarded the degree of bachelor of science in biology were: Carol J. Moses, 1871 South Kedzie avenue; Darwin B. Schmidt, 311 Morgan street, Elgin.

Awarded the degree of bachelor of science in fire protection and safety engineering was: Ronald Ursich, 2025 South Allport.

Awarded the degree of bachelor of science in physics was: Alan H. Phillips, 837 South 19th avenue, Maywood.

Awarded the degree of bachelor of science was: John H. Smith, 1937 West Taylor.

Awarded the degree of bachelor of science in English was: Valentino Leva, 1217 South Springfield.

Awarded the degree of bachelor of science in psychology was: Rita J. Guerriere, 209 North Parkside avenue.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street

Chicago 16, Illinois

CALUMET 9600

Mailed: January 21, 1949

FOR RELEASE: Immediate

CHICAGO-- Fifty-seven north side students at Illinois Institute of Technology were awarded their bachelor's or advanced degrees at 2 p.m. Saturday January 29 at Orchestra Hall, 220 South Michigan avenue.

Henry T. Heald, president of Illinois Tech, conferred degrees to candidates presented by John T. Rettaliata, dean of engineering, John D. Larkin, dean of liberal studies, and William A. Lewis, dean of the graduate school.

After delivering the commencement address, ^{W.M.R.} Dr. Lenox Riley Lohr, president of the Museum of Science and Industry, was made an honorary doctor of engineering by the Institute.

Three hundred and thirty-two students were candidates for undergraduate degrees, with an additional 40 qualifying for master's or doctor's degrees.

Awarded the degree of master of science in mechanics was: Thaddeus N. DeWolf, 1218 Grant street, Evanston.

Awarded the degree of master of science in physics was: Glenn O. McClurg; 4651 North Malden.

Awarded the degree of bachelor of science in architecture were: Arthur F. Kefer, Jr., 1016 Belden avenue; Siegismund O. Schreiber, 2117 Giddings street; Albert L. Wengerhoff, 838 $\frac{1}{2}$ Arlington place.

Awarded the degree of bachelor of science in chemical engineering were: Charles J. Berg, Jr., 6241 North Winthrop; Warren W. Clauson, 2625 Greenleaf avenue; Glen R. Grunewald, 1094 West Pratt boulevard; Ralph Victor Hoffberg, 5327 North Winthrop; John N. Reding, 4320 North Claremont; Frank P. Roccaforte, 1746 Sedgwick.

Awarded the degree of bachelor of science in civil engineering were: Robert Baskin, 1434 West Jarvis avenue; Marshall Berkenblit, 6154 North Talman avenue; George K. Hamilton, 7346 Harvard; Harvey Y. Weinstein, 1246 West Albion avenue.

Awarded the degree of bachelor of electrical engineering were: Fred Bernstein, 1262 West Northshore; George Ducoff, 4844 North Oakley avenue; Arthur Enzer, 1055 Berwyn avenue; Irwin B. Galter, 3744 $\frac{1}{2}$ Pine Grove avenue; Arnold Harrison, 3152 West Lawrence avenue; John S. Hoch, 5557 North Sawyer avenue.

Lothar W. Koenig, 2700 Fletcher street; George Knockstedt, 1013 Linden, Wilmette; David A. Lieberman, 6817 North Wayne; Robert J. Marmorstone, 4613 North Dover; Willard S. McNett, 5923 North Francisco avenue; Raymond M. Preston, 1604 Berwyn avenue; Edward E. Rabin, 1426 Jonquil terrace; Norri Sirri, 4400 North Malden street; Benjamin R. Sutton, 965 West Cuyler; Roger E. Wolff, 5616 North Wayne.

Awarded the degree of bachelor of science in industrial engineering were: Lawrence J. Berg, 5532 North Glenwood avenue; Robert J. Bokosky, 6425 North Seeley; Harold Burak, 4956 North St. Louis; Frederick Dunn, 2501 Leland; Leonard Lehman, 517 Belmont avenue.

The first part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The second part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The third part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The fourth part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The fifth part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The sixth part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The seventh part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The eighth part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The ninth part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

The tenth part of the book is devoted to a general history of the United States, from the discovery of the continent to the present time. It is divided into three volumes, each of which contains a complete history of the country from the beginning to the end of the reign of the President who was in office at the time the volume was published.

James S. Olsen, 195 East Chestnut;

Roger B. Orensteen, 426 Surf street; Alfred A. Petosky, 1003 Forest avenue, Wilmette.

Awarded a bachelor of science degree in mechanical engineering were: George J. Andrews, 1506 Rosemont avenue; Henry W. Bierman, 1918 West Grace street; Ralph W. Bock, 2232 Melrose street; Ernest A. Brunauer, 4703 North Albany avenue; Otto E. Curth, 1629 North Maplewood; John P. Doering, 6118 North Sheridan road.

Edward F. Elenz, 3844 North Bell; Eino W. Linna, 1010 North LaSalle street; Roy A. Loftus, 1322 Diversey parkway; George A. O'Brien, 4533 Greenview avenue; Louis S. Oosten, 725 Case street, Evanston; Rehn C. Peterson, 1807 Green Bay road, Glencoe; Louis J. Sinko, 2820 Cambridge avenue; Milton H. Weinberg, 6116 North Washtenaw; William F. Weprin, 6340 North Wayne avenue; Jacob Zelenietz, 819 West Cornelia avenue.

Awarded the degree of bachelor of science in business and economics were: Anders Bjorklund, 6735 North Maplewood avenue; Ronald J. Born, 515 Briar place; Richard W. Lamping, 3726 North Wilton avenue; Roger E. Sellstrom, Grayslake;

Awarded the degree of bachelor of science in biology was: Wesley F. Rockhold, 2822 North Mildred avenue.

Awarded the degree of bachelor of science in chemistry was: William E. Conrath, 4255 North Broadway.

ILLINOIS INSTITUTE OF TECHNOLOGY

3300 South Federal Street

Chicago 16, Illinois

CALUMET 9600

Mailed: January 25, 1949

FOR RELEASE: Immediate

CHICAGO -- Joseph Fujikawa, 26, a graduate student in architecture at Illinois Institute of Technology, has been awarded a \$1,000 first prize for his design of a community center in a New York "hidden talent" competition sponsored by the Museum of Modern Art and Architectural Record.

Fujikawa, who lives at 5026 South Blackstone avenue, received his bachelor of science degree in architecture at Illinois Tech in 1944. In addition to his graduate work, he is employed in the Chicago architectural offices of Ludwig Mies van der Rohe, who also heads Illinois Tech's department of architecture and is the designer of its new modern campus.

During the war Fujikawa served as a staff sergeant at Fort Snelling, Minn., where he taught Japanese in the military intelligence service language school.

Entries in the New York competition were limited to those who had not won or placed in previous competition and whose work had not been published.

CALL 1-312-551-1000

Mailed: January 25, 1949
FOR RELEASE: Immediate

CHICAGO -- Approximately 500 new freshmen and advanced students will enroll for the second semester at Illinois Institute of Technology, Fred R. Travis, director of admissions, said today.

The total is expected to fall slightly off that of February, 1948, when the Institute admitted 555 students who had not previously attended Illinois Tech. Fifty per cent of the new students will be veterans, Travis stated.

From February 7 through February 11, all new freshmen will participate in an Orientation Week program consisting of tests, lectures, and social functions. They are scheduled to register Friday morning February 11.

Registration for advanced day students will be held Wednesday and Thursday February 9 and 10. A total of 3,500 day students is expected. Instruction will begin Monday February 14.

CHICAGO -- January graduates at Illinois Institute of Technology will be welcomed into the Illinois Tech alumni association at the alumni's weekly luncheon meeting Friday (January 28).

John T. Rettaliata, dean of the division of engineering, will deliver the luncheon address. The graduates receive their degrees at commencement exercises the following day (2 p.m. Saturday January 29, Orchestra Hall).

Dr. Rettaliata, one of the youngest deans of engineering in the nation, is a leading mechanical engineer and a noted expert on both steam and gas turbines and jet propulsion.

The luncheon is scheduled for 12:15 p.m. in the Stevens Building Restaurant, 17 North State.

-fwj-

Note to Editors: A ticket is enclosed in case you care to send a reporter.

FOR THE YEAR 1954

PROGRAM - General Session - 1954-1955

Technology will be witnessed in the field of electronics

at the alumni's weekly luncheon meeting, Tuesday, Dec.

John F. Reilly, Jr., head of the Division of Electronics, will

deliver the luncheon address. The program will be held at

commencement exercises and followed by a reception in

Professor Hall.

Dr. Reilly, one of the youngest heads of departments in

the nation, is a leading mechanical engineer and a leading expert

steam and gas turbines and jet propulsion.

The luncheon is scheduled for 12:15 p.m. in the

Building Restaurant, IV North State.

FOR RELEASE: Immediate

CHICAGO -- A free four-week short course covering the newest developments in masonry construction will be conducted by the Structural Clay Products Institute, Region 5, on the campus of Illinois Institute of Technology beginning Monday February 7.

Designed for journeymen and apprentice bricklayers, contractors, and architects, the course is the first of its kind in the nation. The project is sponsored by Region 5-SCPI with the cooperation of Illinois Tech's civil engineering department. All tuition and enrollment charges are paid by the sponsors.

The curriculum will include discussions and demonstrations on reinforced brick masonry, modular coordination, comparative costs, cavity wall and other specialized topics. Practical problems are to be emphasized. Actual wall sections will be constructed and torn down at class meetings.

Personalized presentation of the material is being arranged for smaller groups. Instructors will be specialists in their respective fields.

Classes will be held from 7:30 to 10:30 p.m. on Monday, Tuesday, Wednesday, and Thursday nights from February 7 through March 3.

Persons who desire more information are asked to write or phone Structural Clay Products Institute, Region 5, 228 North LaSalle street, Chicago, Randolph 6-0578.

CHICAGO -- A luncheon and bridge party will be sponsored by the Illinois Tech Woman's club at 1:30 p.m. Wednesday February 2 in the Bowman Dairy company auditorium, 4149 South State street.

Proceeds will be applied to a one-year scholarship to be awarded the outstanding sophomore student at Illinois Institute of Technology.

Mrs. John J. Ahern, 8753 South Ada, is general chairman of the party.

Committee members are:

Mrs. L. E. Grinter, 5749 Kenwood; Mrs. H. C. Hesse, 9533 Longwood; Mrs. Willis G. Labes, 9046 Fairview, Brookfield; Mrs. J. T. Rettaliata, 9712 South Winchester; Mrs. Henry J. Rushton, 10864 Longwood; Mrs. James Thompson, 5540 Kenwood; Mrs. Edwin R. Whitehead, 9120 Fairview, Brookfield.

CHICAGO -- Three-hundred and twenty-three students -- three-fourths of whom are veterans of World War II -- will receive bachelor degrees at Illinois Institute of Technology's winter commencement exercises at 2 p.m. Saturday (January 29) in Orchestra Hall.

Among the 244 former members of the armed services (or 75.2 per cent of the class) is one ex-sergeant in the Woman's Army Corps -- Miss Ruth Bouril, 28, South Elgin, who will be awarded a degree in business and economics.

One-hundred and twenty-four Illinois Tech graduates (or 38.7 per cent) are married.

Forty-three advanced degrees -- forty master's degrees and three doctorates -- will be presented at the ceremonies. Major Lenox R. Lohr, president of the Museum of Science and Industry and president of the Chicago Railroad Fair, is to be awarded an honorary degree of doctor of engineering.

Major Lohr will deliver the commencement address.

Degrees will be conferred by President Henry Townley Heald. The invocation will be given by the Reverend Kenneth Hildebrand of the Central Church of Chicago.

FOR RELEASE: Immediate

CHICAGO -- Two Englewood high school students will be in the audience at Orchestra Hall Saturday afternoon (January 29) to watch their dad receive his bachelor of science degree.

"Dad" is Henry Wadsworth McGee, 38, of 38 West Garfield boulevard, one of the 366 students who will be awarded degrees at Illinois Institute of Technology's mid-year commencement.

McGee, formerly president of the Chicago chapter of the National Association for the Advancement of Colored People and still a member of the local executive board of that organization, completed requirements for graduation in public administration at Illinois Tech this past summer.

Beside Henry W. McGee, Jr., 16, junior at Englewood, and Sylvia, 14, sophomore at Englewood, Mr. and Mrs. McGee are the parents of a third child, Attye Belle, 3. Mrs. McGee, a graduate of Central YWCA college, is a teacher in the Chicago public school system.

Henry W. McGee, Illinois Tech, page two

Henry, Sr., is in the employment office of the Post Office at Canal and Van Buren streets. He has been with the post office as a full-time employee since 1929, and from 1943 to 1947 was president of the Chicago chapter of the National Alliance of Postal Employees.

In 1930 he completed the course at Crane Junior College, attending on a part-time basis, and enrolled at Lewis Institute (one of the two predecessor institutions of Illinois Tech) immediately after. There he met Mrs. McGee, the former Attye Belle Trusdale, who was a student at Lewis at that time. They were married in 1931.

Henry, Sr., studied chemistry at Lewis, but when he returned to Illinois Tech 14 years later -- in the fall of 1945 -- he changed his major to public administration and found that he had more than 60 hours (four full semester of study) ahead of him.

Attending either day or evening classes and continuing at his regular position with the Post Office, he completed that task in slightly more than three years.

His job, his family, and his study have not consumed all of McGee's time or energy, however. He has remained active with NAACP and other civic or religious groups, including the Cosmopolitan Community Church, 5249 South Wabash, where he is a former chairman of of the board.

Of all the persons gathered in Orchestra Hall on Saturday afternoon, those two Englewood high school students are likely to be the proudest.

FOR RELEASE Immediate

CHICAGO -- The first master's degree in mechanical engineering ever awarded to a woman by Illinois Institute of Technology or its predecessor institutions, will be presented Saturday afternoon (January 29) to a young lady who defied precedent and spent almost six years as a lone woman in classes for men to follow her life's ambition.

She is Lois Graham, 23, 6756 North Sheridan Road.

Miss Graham is among the 366 students who will receive bachelor's and advanced degrees at Illinois Tech's mid-year commencement at 2 p.m. Saturday in Orchestra Hall.

Daughter of Paul S. Graham, professor of physical education at Rensselaer Polytechnic Institute in Troy, N.Y., she graduated at Troy high school in 1942 and enrolled at Rensselaer as one of the first four women engineers to be accepted by that college. Of the three girls who entered with her, only one other, a metallurgical engineer, completed the course.

Lois Graham, Illinois Tech, page two

"I wanted to be a mechanical engineer as far back as my freshman year in high school," Miss Graham explains, "and so I just went ahead and studied for it."

Mechanical engineers at Rennselaer take all courses, including the social sciences and humanities, in a body. Thus, Miss Graham's classmates were always the same people -- and all of them were men.

"At first they acted strangely, and I was kind of afraid and felt out of place," she says. "But after about a semester they began to accept me and everything was fine from then on."

Her grades were exceptional. She gained membership in Tau Beta Pi, highest engineering scholastic honorary, Pi Tau Sigma, honorary mechanical engineering society, and the American Society of Mechanical Engineers, and became an associate in Sigma Xi, engineering society.

Attending summer school, she graduated in less than three full years and in April, 1945, began work as a mechanical engineer in the development division of the Carrier Corporation, Syracuse, N.Y. In the fall of 1946, Miss Graham accepted a graduate assistantship at Illinois Tech.

She specialized in the study of air conditioning and taught two laboratory courses at Illinois Tech. Once, in a graduate mathematics class, there was one other woman student. Otherwise her scholastic company remained the same -- all men.

Lois Graham, Illinois Tech, page three

Miss Graham will stay at Illinois Tech after her graduation. She has accepted a position as instructor in mechanical engineering. She intends, eventually, to work toward a doctorate.

"There are disadvantages in mechanical engineering for women," she says. "There are a few jobs a girl can't do and occasionally one will meet a person who is prejudiced against women in the field. But a woman mechanical engineer can do well, and, in general, I've been treated very nicely".

Would she recommend that other girls follow her lead?

"Yes. I would say, if you want to become a mechanical engineer, become one."

ADVANCE FOR RELEASE AFTER 2 P.M. (CST), SATURDAY, JANUARY 29, 1949

CHICAGO -- Democracy's one chance of extinction lies in the failure of its most able citizens to think and act clearly and fearlessly, Major Lenox R. Lohr, president of the Museum of Science and Industry, told graduates of Illinois Institute of Technology this afternoon.

Major Lohr delivered the winter commencement address in Orchestra Hall and received an honorary degree of doctor of engineering from Dr. Henry T. Heald, president of Illinois Tech.

"At the moment, everything is being challenged," he said. "We have come a long way fast, and it may be that we are winded. The age of mechanization has brought a myriad of new problems, technical and social, difficult of comprehension."

Developments in transportation and communication are eliminating provincialism and isolation all over the world, Major Lohr declared.

-more-

Lohr, page two

"Development carries with it a connotation of change. In my lifetime there has come into common use the electric light, the automobile, the airplane, the radio, and indoor plumbing.

"I have seen the banishment of many diseases, the standardization of mechanical parts, and education for the masses. I have seen many of ^{the} most cherished traditions, hopes, and supposedly immutable laws dissolved.

"I have seen discarded the indivisibility of the atom and the impossibility of the transmutation of elements; the certainty of six per cent interest on investments, the world stabilizing force of the British navy, the superiority of the male sex, and the belief in a war to end wars."

Major Lohr said the result of these changes is a confusion that rocks the world.

"If we are to have a full realization of the new social life that was the inevitable result of the concepts of freedom of our forefathers in the founding of this country, we must reconcile ourselves to a certain amount of confusion and travail in attaining it," he said.

Because college men and women have been taught to think, theirs is the responsibility to reason through the changes, to sort the good from the bad and have the courage to fight for the good and discard the bad.

He urged the graduates to learn to understand and get along with people whose customs, economics, and ideologies are vastly different and to do it without losing "one iota of faith in your own beliefs and birthrights."

Lohr, page three

Mass production techniques have brought physical comforts and lessened exertion.

"All this is fine; but in our desire to have things done for us, for someone else to take care of all our needs and troubles, let us be sure that individual initiative does not languish, that ability to think and do for ourselves does not die--lest our true freedom perish."

FOR RELEASE Immediate

CHICAGO -- Illinois Institute of Technology's evening division will offer 210 undergraduate courses in 20 fields of study and 50 graduate courses in 14 fields during the coming semester, Stanton E. Winston, dean of the evening division, said today.

Undergraduate students will register from 6 to 8 p.m. Monday and Tuesday February 7 and 8 at Technology Center, 3300 South Federal street. Graduates will register from 6 to 8 p.m. Friday February 4.

Dean Winston estimates that the new semester's evening enrollment will equal or surpass last semester's total of 4,467 students. The reason, he explains, is the proportional increase in curricula. Since Winston's appointment as dean in September, 1945, evening courses have nearly tripled in number.

Courses, in addition to those in various fields of engineering, include home economics, mathematics, literature and philosophy, business and economics, and the physical and social sciences.

Evening division, Illinois Tech, page two

The department of business and economics, which has recently undergone an extensive program of expansion, will offer 23 evening courses in economics, accounting, statistics, business law, personnel management, marketing, industrial relations, collective bargaining, effective arbitration, federal tax accounting, market research, and international trade and economic policy.

The evening student now has the opportunity to earn a degree in practically any field offered to daytime students at Illinois Tech, Dean Winston stated.

To receive academic credit, the evening student must have the equivalent of a high school education and fulfill the school's entrance requirements.

The 17-week term will begin Monday February 14 and end Saturday June 11.

CHICAGO -- Twenty-six persons from outside the Chicago area were among the 366 students who received degrees at Illinois Institute of Technology's winter commencement exercises at Orchestra Hall, Saturday January 29.

Henry T. Heald, president of Illinois Tech, conferred degrees to candidates presented by John T. Rettaliata, dean of engineering, John D. Larkin, dean of liberal studies, and William A. Lewis, dean of the graduate school.

After delivering the commencement address, Major Lenox Riley Lohr, president of the Museum of Science and Industry, received an honorary doctor of engineering degree from the Institute.

Awarded the degree of master of science in civil engineering were:

David W. Bardwell, 1508 W. 50th St., Oklahoma City, Oklahoma.
James M. Paulson, 922 7th Ave., Warsaw, Wisconsin.

Awarded the degree of master of science in mechanical engineering were:

J. B. Bouthillette, 1899 LeClaire, Montreal, Quebec, Canada;
Lois Graham, South Lake Ave., Troy, N. Y.

Awarded the degree of master of science in electrical engineering were:

George H. Ember, 509 W. Walnut St., Taylorville, Illinois;
Glenn Robertson, Road 3, Sherman, Texas.

Awarded the degree of master of science in gas technology was:

James H. Kelly, 635 Springhill Ave., Shreveport, Louisiana.

Awarded the degree of master of science in chemical engineering was:

John Jeffery Moon, 101 W. 66th St., Kansas City, Missouri.

Awarded the degree of bachelor of science in electrical engineering were:

Edward J. Adolphson, 1021 12th St., Rockford, Illinois;
Michael Devich, 1003 Morris St., Hammond, Indiana; Hale P. Faris,
5144 DeLongpre, Hollywood, California; Frank A. Koditek, 79-24 Elks
Road, Elmhurst, L.I., New York; Raymond E. Schreiber, 3511 Hollywood,
Hollywood, Illinois.

Awarded the degree of bachelor of science in civil engineering were:

James C. Brown, 107 E. South St., Painesville, Ohio;
Roland E. Fisher, 201-D Monticello Cts., Alexandria, Virginia.

Awarded the degree of bachelor of science in mechanical engineering were:

Joseph H. Dannenmaier, 7061 Tholozan Ave., St. Louis, Mo.
Robert C. Elliott, 1713 Vernon St., Rockford, Illinois; Arthur J.
Fredenburg, Jr., 109 Bradley St., Buffalo, N. Y.; Charles A. Haase,
6056 Maxwell St., Detroit, Michigan.

FOR RELEASE: Immediate

CHICAGO -- The Illinois Tech and Wayne university basketball teams will meet Wednesday night (February 2) for the first time since 1935. The contest is scheduled for 7:15 p.m. on the Techawks' home court at 32nd and Dearborn streets.

The visiting Tartars, who dropped a narrow 37 to 35 decision to Michigan State last week, are expected to make the Techawks their tenth victim in 19 starts this season. Illinois Tech, idle since January 14, has won six and lost four.

Ed Glancy's squad faces Wayne without two of the lads who have held first-string jobs since the season's opener. Capt. Carl Bergstrom, high-scoring forward, was graduated Saturday, and Leo Kiley clever sophomore guard, will probably miss the remaining eight games because of illness.

Replacing Bergstrom will be Carl Matson, lanky junior. Matson led the Techawk scorers last year but has been unable to find the range with consistency this season. Phil Urasky, defensive specialist, and Freshman Tom Goralka will plug the spot vacated by Kiley.

George Scalamera, who is averaging more than 15 points a game, will be at center for Illinois Tech, with Bob McCue, freshman star, at the other guard and Sophomore Bob Leiser paired with Matson at the forwards.

Joel Mason, Wayne coach, will open with Jim Rucinski and Charles Frankel, the two leading Tartar scorers, at forwards, Dick Hall at center, and Al Guzzo and Noah Brown at guards.

Illinois Tech and Wayne have met six times, each school winning three contests. The Techawks squeezed out a 33 to 32 win in the last meeting in 1935.

CHICAGO -- Dr. Enrico Volterra of Rome, Italy, has been appointed associate professor of mechanics at Illinois Institute of Technology, effective tomorrow (February 1), it was announced today by Dr. LeVan Griffis, head of the department.

A native of Italy, Dr. Volterra obtained the degree of civil engineer in 1928 at Rome University. Later he did design work in reinforced concrete structures.

From 1934 to 1938 he taught mechanics and structures at Rome University. In 1939 he went to Cambridge University and did research work on structural problems and materials testing at the engineering laboratory. He was awarded a Ph.D. degree by Cambridge.

He returned to Rome in 1946. He is the author of numerous technical papers in Italian, German, and British journals.
